### RECREATION AREA HERE AMONG BEST

Chicago Paper Says H. P. Probably Leads All Cities in Playgrounds

The following from the Chicago Herald and Examiner indicates the notable position occupied by Highland Park in the matter of playgrounds and public recreation facilities generally, credit for which is due largely to the efforts of the East Park district board and its superintendent Edward M. Laing. The Examiner says:

the Chicago Regional Planning asso- Mrs. Lowry won third prize. ciation.

Park may lead the world in the amount of acreage devoted to recreation. It leads in the Chicago area by a large margin, and no incorporated city is reported as approaching it.

"It has 40 acres of parks and playgrounds per 1,000 in population. A standard that has been set as approaching the ideal condition requires only 10 acres for 1,000 persons. Highland Park, therefore, is already prepared for four times its present population.

"Evanston takes its place near the bottom of the list with but 2.3 acres per 1,000 population. The survey indicates that Evanston, as one of the most rapidly growing cities in the Chicago area, is called upon to give serious thought to the subject of parks and playgrounds for the future.

"Altogether the north shore suburbs make an excellent showing. Among those above the 10 acres per thousand population standard are Glencoe, with 16.6 acres; Lake Bluff, 29.5 acres; Lake Forest, 26 acres, and Winnetka, 18 acres. Waukegan, with 8.7 acres, approaches the standard. Libertyville is the low spot of the area included in the survey, with 1.1 acres per 1,000 population.
