

# SOUNDLESS

With no moving parts to wear out or make noise, Electrolux is forever silent and dependable.

**STEADY  
COLD**

*are features  
found only in*

**ELECTROLUX**

See it before you  
buy *any* automatic  
refrigerator

An automatic refrigerator can be *Silent* only when it produces cold without the use of machinery. Moving parts required in all other automatic refrigerators are absent in Electrolux, the GAS Refrigerator. Cold is produced in Electrolux by a device so simple that it never wears out... never makes a sound.

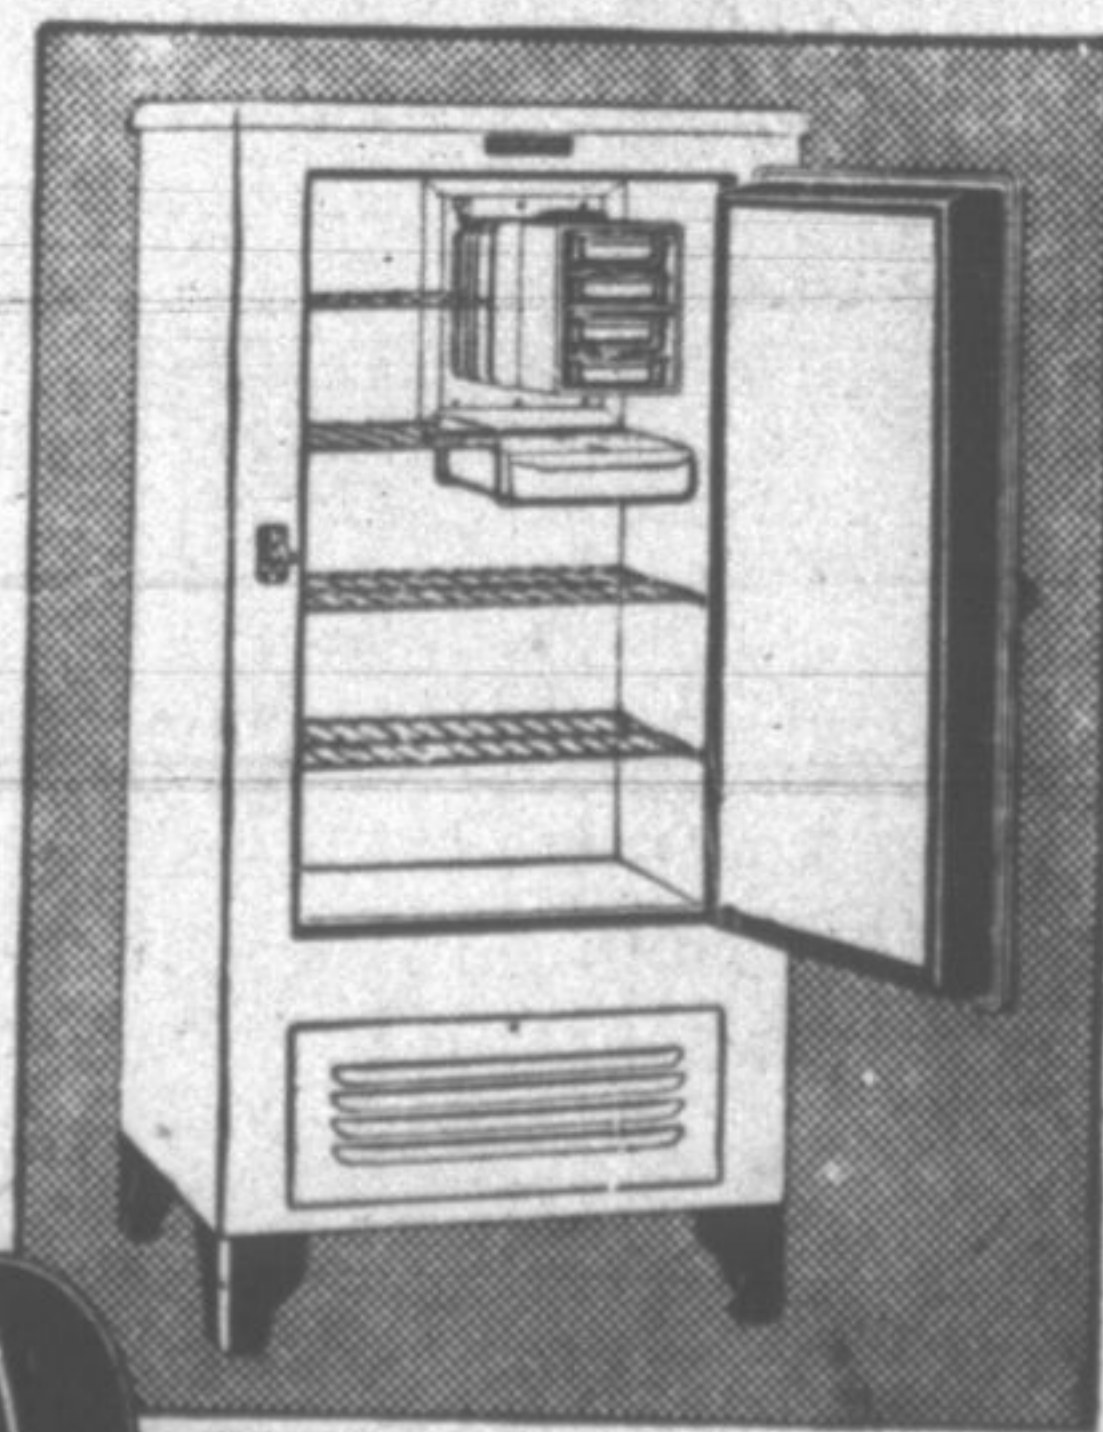

Instead of motors, fans, and many other intricate mechanisms present in other automatic refrigerators, a tiny gas flame and a trickle of water, acting on a harmless refrigerant hermetically sealed in steel, produce steady, unvarying cold temperatures in Electrolux.

The absolute SILENCE of Electrolux is an important feature when you consider that soundless operation means complete absence of annoying noises. Noiseless operation also is proof of its ability to serve you indefinitely. With no moving parts to need replacement or require oiling and

other attention, there is no reason why Electrolux should ever wear out.

Year after year Electrolux will give you matchless refrigeration service. It will protect foods from spoilage... freeze a plentiful supply of ice cubes... make frozen desserts that are so popular on modern menus... chill salads... in fact, do all things an automatic refrigerator should do... but doing everything SILENTLY.

NOW is the time to learn more about this most modern, soundless automatic refrigerator. Just come in or telephone. You will not be obligated in any way.
