# ARE NOISES AND ODORS "MODERN"?

**M**ANY so-called "modern" heating devices embody disadvantages which mankind has tried to abolish for centuries—noises—odors—smoke and soot—have no place in Twentieth Century comfort.

Anthracite, the clean, long-lasting fuel, is absolutely silent and odorless. No greasy film clings to your walls and draperies when you burn anthracite. There is no smoke to pollute the air of your home and of your neighborhood.

And anthracite is **SAFE**. You can store as large quantities as you please without fear of fire or explosion. Because anthracite depends on no outside source of power to keep it burning, you are freed from the terror of being left without heat when storms damage power lines.

Order a supply of Famous Reading Anthracite—that better Pennsylvania hard coal—for next winter—decide to have better, more dependable heat at lower cost. A telephone call will bring you prompt service.
