WHEN you buy a Ford car today, you buy what is unquestionably the greatest value in the history of the Ford Motor Company. Never before has so much beauty, comfort, safety and performance been offered at such a low price.

The low price of the Ford is something to think about because it means an immediate saving of many dollars — always an important consideration. But far more significant than price alone is what you get for that price. When high quality is combined with low price, you may justly take pride in having found a most satisfactory purchase.

See the Ford — ride in it — learn something about the value that is built into every part. The more you know about it, the more certain you will be that it is the car for you. It is literally true that when you "get the facts you will get a Ford."
