# HELP?

May we remind you again that for a small payment down you can turn your home laundry into a modern *power laundry* and let electricity do all the hard work. It's cheaper, too, than sending clothes out.

## This is the way you'll wash your clothes

Load them into the roomy tub of the washing machine, switch on the motor—and let it wash out all the dirt, thoroughly but gently. Then guide the pieces through the wringer—let it squeeze out the water. While wringing out one tubful of clothes, the machine is washing another. You can have an average washing out blowing on the line in two hours or less!

Let us demonstrate these new washers at your Public Service Store. Prices start at \$99.50. For a limited time all of them are only **\$2 DOWN**  
18 months to pay

## This is the way you'll iron your clothes

Sit down while you guide the washing over the long roller of the electric ironer. Catch each piece (shirts and fussy things as well as flat pieces) as it comes sliding out warm and smooth—ready to fold and store away. Your ironing is done in one-fourth the time.

See how easy it is at your Public Service Store. Ironers are priced at \$79.50 and up. For a limited time, any model you select at **\$2 DOWN**  
18 months to pay

Your local appliance dealer also carries a complete line of electric washing and ironing machines
