REAL COMFORT—

WITHOUT

"SERVICE CHARGES"

FAMOUS Reading Anthracite, the smokeless, dependable fuel, gives you real COMFORT—without the constant succession of "service charges" which some so-called modern heating devices make necessary.

For, with anthracite, there is no delicate apparatus to get out of order. Anthracite-heated homes need not depend upon mechanical devices which are likely to fail at the time they are needed most.

Anthracite heat is STEADY. When you burn anthracite, properly controlled with a thermostat, the fire is never completely extinguished, as in liquid fuel burners, but is speeded up or slowed down as the thermostat commands—the heating system at all times is giving off just the right amount of heat.

Before you invest in complicated, costly heating systems, try out P and R anthracite. Our heating expert will prescribe the most economical sizes for your heating plant—call us for a trial order TODAY.
