BURN OIL

BURN OIL

To Every Owner of a Modern Home

The rapid development of automatic control for home heating plants is closely allied with the growing acceptance of oil burning equipment. Hundreds of thousands of families now enjoy a new experience in living . . . real heating comfort, without the work and worry of furnace care.

Eliminating guesswork, uncertainty and waste, the oil burner provides an unfailing supply of heat regulated by actual room temperatures. Yet the carefree convenience of this remarkable heating service is NOT a luxury. It is not a costly improvement for big homes only . . . it is just as adaptable to the modest cottage . . . in fact a NECESSITY in every modern home.

Not only in the basement, but throughout the rest of the house as well, oil heat makes a wonderful difference in cleanliness. Relief from the smoke, soot, and dirt, inseparably associated with coal, cuts cleaning costs in half and makes it possible to completely utilize your basement.

Medical authorities have long warned against overheated homes, as well as chilly rooms. Uneven, fluctuating inside temperatures comprise a recognized menace, lowering bodily resistance and leading to colds, grippe, "flu," and even more serious disorders. Doctors say that 60 per cent of all respiratory diseases and similar winter ailments are the result of improper home heating.

It's a wonderful convenience . . . this new, yet proven method for heating homes economically. You need it too.
