ved "family style."

3 OUTSTANDING INSTALLATIONS of the Field Barometric Draft Control

15% to 25% Fuel Savings Guaranteed

ST. MARY'S SEMINARY ON THE LAKE

At Mundelein, Illinois. This institution formerly used annually three thousand six hundred tons of coal. Our engineering department made a survey and guaranteed a seven per cent fuel saving through the installation of the Field Barometric Draft Control. This control in operation through evaporation tests is actually showing better than thirteen per cent saving in fuel.

SKOKIE SCHOOL, WINNETKA

YORK TOWNSHIP HIGH SCHOOL, ELMHURST

These two public institutions are each large users of fuel. Arrangements have just been completed to install the Field Barometric Draft Control on a guaranteed basis of a minimum of 15% saving in fuel. What the Field Barometric Draft can do for others it can accomplish for you. Let us survey your heating system and submit a bonifide written money back guarantee on the savings we can accomplish for you.

*Hundreds of home owners
on the North Shore are
saving from 15 to 25 per
cent on their fuel costs
through the Field Baro-
metric Draft Control.*

*Lists of these owners
will be gladly sent upon
request.*

**More than 7000 Satisfied Users
in the Chicago Territory Enjoying 15% to
25% Fuel Savings**
