...with COKE

Note These Economy Features:

- (1) Gives More Heat
- (2) Leaves Few Ashes
- (3) Makes No Grime
- (4) Burns Longer without attention
- (5) Responds Quickly to Regulation

The picture on the right illustrates the quantity of ash taken from a heating plant where ordinary fuel was used. On the left you see the much smaller container which holds ashes remaining after COKE was burned for an equal period. COKE leaves comparatively few ashes!

The United States Bureau of Mines in an official report states that COKE is a highly satisfactory home heating fuel. Guide yourself by this reliable recommendation and burn WAUKEGAN KOPPERS COKE. There is a size that will burn with greatest efficiency in your heating plant. Call your fuel dealer and ask him to send a Waukegan Koppers service man to recommend the correct size for you to burn. There is no obligation to you. Or return the coupon below for complete information.
