Whether You Spend \$50 or \$5,000

of your House Furnishing Budget for this year, make certain that it is spent carefully, wisely; that the result will add, in full measure, to the comfort and charm of your home; that work done now, or the new furniture you buy, will not be discarded in a few years as being useless or out-of-date. Good fabrics and furniture are lower priced; there are very many more really fine things available than ever before.

New Linens, Chintzes, Upholstery Fabrics in smart patterns and colors or reproductions of fine old materials — Furniture copied from beautiful 18th Century English and French pieces — These can all be seen at your convenience at our shop. Estimates for proposed work, regardless of the amount to be done, will be submitted, and without obligation on your part.
