Local Players in Ping Pong Match in Chicago This Week

Hundreds of Highland Parkers are planning to play or witness the annual ping pong classic of the West, namely the Western Ping Pong Championship to be held Friday and Saturday, Feb. 26 and 27 in the Grand Ball Room of the Palmer House. Coleman Clark, of Glencoe, present title holder will try to repeat, but will be pushed to the limit by several local entries who have improved vastly over last year. From Highland Park there will be such veterans as Dougall Kittermaster, Highland Park champion, Robert E. Clark, last year's title holder, R. G. Hammond, recent winner of the

WINTER STUDY

By Marshall Pottenger
Landscape depends on knowledge and work, as well, as a well designed plan and arrangement. When an artist uses paints, his beautiful work would be of little value if his pigments soon faded and died away. In order for landscape to continue to exist and develop into a beautiful painting, the material used must thrive and grow. Every living thing in landscape depends on five things air, heat, light, moisture and plant food. Most people are familiar with plant food and moisture. But few are qualified to speak much about air, heat, and light. When air is excluded from the soil by heavy and continuous rains, or from over-watering, the free nitrogen is soon used up and the microbe organisms soon use up a large portion of that available nitrogen in the form of fertilizer and once the soils supply of nitrogen becomes seriously depleted the plants soon are off color, become puny and have a poor appearance in the landscape. Soils that are commonly termed as close or tight soils, meaning the air area in the soil is very limited, are very subject to harm from continued rains and over-watering. This condition may be improved or corrected by using peat, litter, stable manure, sand or fine gravel, and work it deeply and thoroughly into the soil. Heat in the soil is governed easily by micro-organisms in the soil to become active and it is through their

activity that causes proper decay so that various elements of plant food are soluble and available for plant use. Soil is warmed a great deal in the early Spring by warm Spring rains, therefore soil that has good absorbing ability warms up much quicker than would soil where the rains all run off the surface. Heat in the soil is governed easily by cultivation. When soil is stirred or loosened it becomes dry on the surface very quickly, because the current or flow of moisture to the surface has been broken, the power of capillary attraction no longer exists as this power is only present when the connection of moisture from one particle of soil to another is continuous. There are numerous other things that enter into soil warmth, and the control and conservation of heat, such as the color of the soil, thickness of the film of moisture, solution of soil water, that is the amount of salt, potash, lime, phosphorous, etc. There is little known regarding the effect of light on plant roots, but it is a well known fact that many plants root deeply in the soil, while others prefer a shallow rooting area. I will not attempt to classify these plants here but anyone familiar with plants will soon be on his guard and not plant too deeply when once his attention is brought to the fact. You have only to ask your nurserymen if a tree or shrub or evergreen has a lateral growing root system.

Ravinia title, E. J. Snobble and Jimmy Weber. Also Dade Epstein, standard club title holder. Out of town stars who will vie for honors are the champions of Detroit, Cleveland, Louisville and St. Louis. The tournament is sponsored by the Interfraternity club, and sanctioned by the American Ping Pong association. Mr. A. A. Stagg will be honorary referee. Tickets are on sale at Spaldings, state street store.

Blue Bird Restaurant Goes Out of Business

The Blue Bird restaurant, sometimes known as the "B and L," whose proprietors were Bertolini and M. Lencioni, has gone out of business. The stock and fixtures were purchased by a man from Geneva. The Blue Bird has occupied the second store in the Deerfield State Bank building on Waukegan road for about ten years.
