

How the Banks of the Nation Have Been Made Stronger by Experience

The standards of banking stability were never higher than they are today, as a result of the lessons learned in the most tremendous testing-ordeal in banking history.

Old principles of safe, conservative management have had their soundness re-established. Bankers themselves are taking the lead in efforts to surround banking with every safeguard to make the strength of today permanent and unassailable. Through their state and national organizations, they are working

for improved legislation, for more uniform practices, for still higher standards of supervision and management.

At the same time, bankers are seeking to bring about a better understanding by the public, of the nature and principles of sound banking. They are working to bring about a closer co-operation based on mutual interests and mutual confidence.

The banks of the nation have been made stronger by experience.
