# Buy a Coolerator and save money, time and food

## Saves Money

The Coolerator costs less to buy and less to operate than either old style ice refrigerators and less than so-called electric refrigerators. Let us prove this fact to you. Ice is the most economical refrigerant you can buy.

## Saves Time

The Coolerator saves time because it is easy to keep clean and because it is iced less frequently. Never more than three icings in two weeks, even in the hottest weather. Plenty of pure ice for desserts or drinking water always available.

## Saves Food

The atmosphere in the Coolerator is just right for the preservation of food. It is cold enough but not too cold. Dry enough but not too dry. Food kept in the Coolerator retains its natural flavor. Natural food odors and gasses are constantly washed out of the air in the Coolerator and carried down the drain.

## See It Today

Don't take our word for what the Coolerator will do. Come in and see it or better yet, let us place one in your home where you can see for yourself what a really wonderful and economical refrigerator it is. Come in today or phone 34.
