

Millions of People Are Still Saving Money

Many people are saving more money now out of reduced incomes than they did in their most prosperous days.

They are doing this not because they have been told to be thrifty, but because the past two years have shown more clearly than ever before that there is no

substitute for a steady growing savings reserve in a strong, well-managed bank.

Steady deposits made by the average citizens of every community, are laying a new and solid foundation for the progress of the future.
