Trade In Your Worn Tires for Safe Gripping Non-Skid Firestone Tires

LIBERAL trade-in allowance—*now*—on all Firestone High Speed and Heavy Duty Tires!

Why take a chance on worn, smooth, uncertain tires when you can buy Firestone non-skid safe, proven tires at lowest prices.

Firestone Tires are designed to grip the road. The non-skid tread is thick, tough and gives 25% longer non-skid safety.

Glen Schultz only last month set a new world's record in climbing Pike's Peak, in 16 min. 47 sec. His top speed was 78 miles per hour—negotiating many hair-raising turns where a skid or a tire failure meant death.

It's that kind of stamina that makes Firestone Tires safe and economical for you.

That's why race drivers use Firestone Tires. They won't risk their lives on any other make.

No tire in the world has the Firestone endurance. That is because Gum-Dipping, the patented Firestone process, transforms the cotton cords into tough, sinewy units. It means that the liquid rubber penetrates every cord and coats every fiber, assuring protection against internal heat. Two extra Gum-Dipped Cord Plies under the Tread, give 56% stronger bond between tread and cord body.

Don't buy cheap tires that are only made to sell. Don't risk your life on wet, slippery pavements these October days—Use the same precaution race drivers use. Trade in your old tires—We will give you a liberal allowance on Firestone Tires—the *safest tires in the world.*

The Firestone tread is designed with angles and projections to give the maximum traction and non-skid. Firestone Gum-Dipped Tires hold all world records on road and track for Safety—Speed—Mileage and Endurance.

PREPARE YOUR CAR FOR WINTER DRIVING
