MAY USE GAS TAX FOR COUNTY RELIEF

Belief Expressed That County Board May Dip Into That Fund For Aid

fuel tax for pauper relief was expressed last week by members of out at the December meeting.

There actually will be \$251,799.13 available in the reserve fund, computed on the basis of the present such splendid ideas to help us over Josephson, of 1611 S. Green Bay Read The Want-Ads the board intends to exhaust its entire reserve.

The balance in the motor fuel tax fund in the state treasury to the credit of the county was \$379,201.95 Aug. 1, 1932.

\$190,000 For Bond Issues

Of this the county board allocated \$190,000 for the payment of principal and interest of its four road bond issues.

This is to be paid out during the year as follows:

First bond issue; originally for \$500,000 and to be cut down to \$100,-000, \$25,000 in principal and \$6,250 in interest.

second bond issue; originally \$1,-000.000 and to be cut down to \$300,-000, \$50,000 in principal and \$17,500 in interest.

Fourth bond issue; originally \$1,-250,000 and to be cut down to \$1,-195,000, \$30,000 in principal and \$61,250 in interest.

The amounts shown as owing are the amounts that will be due when the \$190,000 is applied to interest and principal, the county records show.

In the first six months of 1932 the amount of motor fuel tax allocated to Lake county was \$84,199.06. Presuming the income for the remaining six months is the same as the first six months the gasoline tax would pay the county \$168,398.12 for the year or \$21,601.88 less than has been planned in payment of principal and interest.

Amended Law

The state legislature amended its motor fuel tax so that until July 1, 1933 counties can draw upon it for poor relief through a request of the majority of the county board of supervisors.

The rapid exhaustion of pauper funds, due to the unemployed, has the poormasters of the county, especially in Waukegan township, in a financial morass.

The board is pledged to pay the entire Fourth bond issue out of the motor fuel tax, so that it will never fall into the classification of direct taxation, and it is the consensus of opinion of board members that the First and Second bond issues should remain in a division with the Fourth issue. The placing of the First and Second bond issue for payment out of the M. F. T. brings a cut of 17 protection over these cents on the \$100 assessed valuation of the county, members of the finance committee point out.
