## QUALITY Versus PRICE

More inferior goods are on the market today than ever before. This applies to all kinds of merchandise other than food. But there is a difference—if you buy a cheap dress, or shoes, you can wear them without injuring your health; but cheap food may be positively injurious to your health.

After all there is so little difference, in the price, between good food and poor food that we are safe in saying it will not average more than 5 per cent.

Remember, please, that whenever you come in our store your money will buy more good food than you can get elsewhere for the same money.

### Loss in Lake County Farm Crops Is Being Registered This Year

Great loss in farm crops of Lake County is being caused by the continuation of early heavy rains and prolonged drought in this region, according to H. C. Gilkerson, farm visor of Lake County. Corn will not develop into a very profitable crop this year if the drought continues, and while first plantings of alfalfa were good, second crops will probably be poor. Pasturage for livestock is suffering and lack of rain is causing deterioration in small grains, although soy bean crop is normal and winter wheat may turn out well.

### Harry Ward Lotts Passes Away Tuesday
