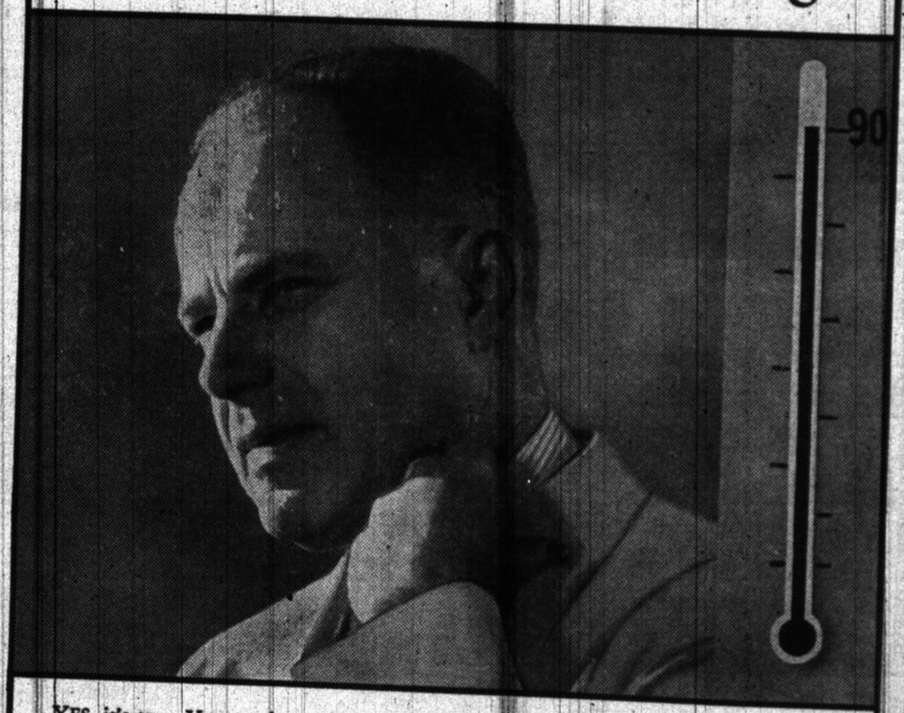
CHEER UP—*have you heard about home air conditioning?*



YES, it's true. You can be perfectly comfortable in your home on the hottest, stickiest summer day — after air conditioning equipment has been installed. You can turn on the cold as easily as you switch on a light.

A modern air conditioning system does three things: (1) It cools air when it is too warm. (2) It dehumidifies air when it is too moist. (3) It purifies air and keeps it in constant circulation.

Air conditioning equipment is practical for a whole house or for one or two rooms. Call your nearest Public Service Store for complete information. You won't be obligating yourself in any way.

VISIT "MOUNTAIN-AIR COTTAGE"

In your Public Service Store at 911 Church Street, Evanston, we've equipped a little cottage with an air conditioning system. Come in and feel how comfortable it is on any kind of a day.

See the modern home lighting display at the exhibit of the Electrical Industry in the World's Fair Electrical Bldg.
