**GREAT NEWS, MRS. WILSON. . NOW. I HAVE BOWMAN'S NEW VITAMIN D SUNSHINE MILK. YOU'LL WANT IT FOR THIS YOUNG FELLA I EXPECT.**

**NOW Bowman makes Vitamin D Milk available to your family. Bowman's Milk of Superior Flavor, as fine-tasting as ever, irradiated by the famous Steenbock process. Learn now what that means.**

Milk irradiated in this way is rich in the "sunshine vitamin". It prevents rickets, a nutritional disease of the bones that strikes a surprisingly high percentage of all city children.

Bow legs, knock knees are results of advanced rickets discovered too late. Doctors, fortunately, can spot other less noticeable symptoms earlier. But no parent should take chances.

The wise thing is to prevent rickets. Now you can do it, economically and easily.

One quart every day of Bowman's Vitamin D Sunshine Milk will safeguard your child against this hazard!

It is an easy and most economical

way of providing an effective amount of Vitamin D in the diet, for this milk will cost you only one cent a quart more than the regular Bowman's Milk.

#### An important protection for mothers

Every expectant and nursing mother should have Bowman's Vitamin D Milk to protect her own teeth, and to help safeguard her baby from rickets and dental troubles.

Adolescents should have the new Irradiated Milk to foster growth. Adults should have it, too, because it is so rich in Vitamin D. Few foods supply this vitamin. Most adult diets don't provide enough of it.

Tomorrow morning, tell the Bowman route salesman you want Irradiated Vitamin

D Milk for your family. Or call Superior 6800 or your local Bowman Dairy Company office.

**BOWMAN DAIRY COMPANY**
