

Compactness is coupled with capacity in this new streamlined tank truck recently put into service by the Pure Oil Company. By mounting the driver's cab over the engine, the weight is more evenly distributed. The wheelbase, thus shortened to 124 inches, makes city driving easier, and even when coupled with a four wheel trailer, comes within all state limitations of over-all length. The engine, placed over and forward of the front axle, is accessible from the driver's cab, and may be drawn forward on its tracks for complete overhauling. The tank is constructed of a new type light steel with seamless steel tubing for supports, and was built by the Heil Co. The walk way over the compartments further protects the gasoline from dirt and dust. The capacity is 1500 gallons of gasoline, with places on the side for 24 five-gallon oil cans. Not only the brakes, but the clutch, gear shift, horn and stop light are air controlled.

Deerfield Fire Dept. Answers Many Calls

Grass fires in all parts of the village kept the Deerfield Volunteer Fire Dept. busy last week. The most serious of these fires was the one Thursday which threatened the Kottrach and Franken nurseries and buildings. A spark from a train had ignited the field south of their properties. The fire fighters were summoned from another fire to help. Women from the neighborhood lent a hand and aided in checking the blaze, which fanned by a southeast breeze had threatened destruction to that locality.
