For the "off and on" heating periods of Fall and Spring

... install a FIREDOR GAS BURNER

The Firedor Gas Burner is for fall and spring heating. Its installation lets you use your present fuel for winter heating.

Burning ordinary fuel is especially difficult and wasteful during fall and spring . . . for outside temperatures are in constant fluctuation. Perhaps you need heat only for a few moments in the morning, again in the middle of the day, and in the evening. If this heat can be secured quickly, and without kindling fires, you enjoy perfect convenience and greatly increased comfort.

A Firedor Gas Burner installed in place of the firing door of your heating plant eliminates every fall and spring heating bother. You turn it on when you need heat . . . turn it off when your home reaches a comfortable temperature. It ends the need for building fires . . . and prevents waste of fuel. With the Firedor you have complete control over your heating plant and the quantity of heat you desire.

You buy nothing to enjoy heat this fall with a Firedor Gas Burner. We install a Firedor in your heating plant now ON TRIAL so you may enjoy its use on chilly fall days. If, after a trial, you wish it removed, we will take it out without expense to you. Telephone now for full particulars.

- Special low rate for this service
- Eliminates all furnace tending labor
- Prevents overheating and underheating
- Gives perfect control over home temperature
- Ends need for re-kindling or building fires
- Heats most homes for no more than cost of ordinary fuel
- Used 35 to 40 per cent of the heating season

Now! TRIAL OFFER Now!

So that you may have a Firedor Gas Burner without making any investment, we will install this burner in your heating plant without cost to you. While you are trying the Firedor, you pay only \$2 monthly. This trial offer makes it possible for you to try the Firedor Gas Burner without obligation to buy. Ask for all the facts now.
