

Model Airplane Contest at Great Lakes Oct. 27

The Admiral Moffett Aviation Post of the American Legion will sponsor a model airplane show and contest at the Great Lakes Naval Training Station on Saturday, Oct. 27. All model airplane builders of Lake County are eligible to enter their work in this contest.

Prizes will be given for the best models built to scale, and the best flying models. The contest will start at 1 p.m. and will last about 2 hours. Commander W. M. Solberg of the Post is in charge of the event. Information may be secured by addressing Mr. Solberg at North Chicago.

National P. T. A. Officer To Speak In Evanston

The attention of all Parent-Teacher Association groups is called to a meeting of the Lake Shore Division of the Illinois State Teachers Association at the Evanston High School on Oct. 29, beginning at 10 a.m.

The speaker for the P.T.A. groups will be Dr. J. N. Artmore, executive secretary of the Religious Education Association, director of the Chicago Civic Club, and chairman of character education for the National Congress of Parents and Teachers.

It is hoped that a large representation of Highland Park P.T.A. members will be present.

World's Fair Uses a Large Volume of Gas

Although people in this district have now had almost two years in which to get acquainted with the Century of Progress Exposition, it is still too new and awe-inspiring to permit anyone to get a true picture of the magnitude of the undertaking. One indication of its size can be gained by realizing that the amount of gas used on the fair grounds in a day is equivalent to the consumption of an average city of 55,000. This volume is largely accounted for by the use of gas for cooking and heating by some 300 concessionaires and exhibitors.

Some of the interesting heating jobs handled by gas include maintaining correct temperature in the baby incubator, baking clay vessels in the Haeger pottery plant, and heating steel to 2300 degrees for the Chrysler drop-forging hammer. All hot water is heated by gas. The largest air-conditioned building on the grounds, that of the American Radiator Company, uses a gas fired system. Probably the newest use for gas is in two 3000 candle power floodlights which equal the intensity of searchlights yet embody such softness that they can be viewed direct by the naked eye without discomfort.

David Alan Munro Is Editor of "Roto," a National Magazine

A national picture magazine called "Roto" appeared on the newsstands last month. The editor is David Alan Munro, formerly of Green Bay Road, Highland Park. The new venture, according to Mr. Munro, provides easy reading of interesting news of the day and at the same time portrays that news in pictures which make appeal to the lovers of fine photography. "Roto" is published fortnightly in New York.

In 1932, it will be remembered, David Munro founded the "Daily Palma Post" in Palma, Mallorca. After two years in the Spanish archipelago, he sold his interests and returned to New York. Before his editorial experience in Europe, Mr. Munro was a member of the staff of "Time," later assistant editor of "Tide."
