## "I'VE LOST MY KEY"

"I've lost my safety deposit box key," was the message we received over the phone one day, "don't let any one open my box."

We explained to our patron that such a thing would be impossible because of our Master Key system. It requires two keys to open each box—one belonging to the bank and the other kept by the owner of the box.

A stranger might have a dozen keys but they would be worthless to him. This danger, like all other risks has been provided for in our up-to-date vault.

You see a Safety Deposit Box is really safe—that's why you will have a feeling of satisfaction when your valuable papers are in your own private box in our fire and burglar proof vault.
