

Ravinia Garden Club Holds Successful Flower Show

HIGHLAND PARK IS FOURTH IN BUILDING

August Building Total Shows Substantial Gain Over Last August

Highland Park's building total for the month of August, 1935, was \$32,044, representing a gain of \$22,114 over the same month of the preceding year, and a loss of \$305 from the total of July for this year.

Evanston was first in a group of nine North Shore towns, with a total of \$112,500, Waukegan coming in a poor second with only \$39,331, closely followed by Winnetka, with \$39,150. Highland Park's figure put it in fourth place in the group.

Complete figures for the nine towns, showing building totals for August, 1935, 1934, and for July of 1935, are as follows:

Evanston	\$112,500	\$41,500	\$52,750

Wet Leaves Cause Autumn Accidents

Masses of wet leaves, topped with a thin dry layer, constitute one of the Fall hazards that annually increase the automobile accident rate, according to engineers of the Chicago Motor club.

Drivers speeding along pavements not long dry after rain are likely

to skid on piles of leaves, also apparently dry on the surface. Underneath, however, the rotting foliage retains moisture often for days. The danger, although greater along country highways where cars travel more rapidly, is also present in many built-up sections.

A skidding car, the engineers pointed out, can best be controlled without use of the brake. The driver need only throw out his clutch, steer the front wheels into line with the rear ones, wait for the skid to lose momentum, and then step on the accelerator to be on his way again.

We don't know anything about these nudist colonies, personally, but we would guess that the best looking girl in the summer season would be the one with the fewest chigger bites.

Secretary Wallace is quoted as saying that if it hadn't been for the production control program pork would be even higher today than it is. Then burning the pigs wasn't a success after all?
