The Recipe Box

Conducted by PHIL LIBBY

Director, Home Service Department
Highland Park Press and Deerfield Press

(Editor's Note: You are invited to write your questions about recipes or household information to Phil Libby, in care of this newspaper, enclosing a self-addressed, stamped envelope. He will be glad to answer you promptly. It will be impossible to answer questions received by telephone.)

As I promised, here are the remaining recipes used at the Gas Company's showroom demonstration, held from Jan. 31 to Feb. 11:

Lemon Sherbert
Mix one package of Royal Vanilla pudding, 1 cup milk, 1/2 cup water, and bring to a boil, stirring constantly. Remove from fire and add 1/2 cup of sugar, cool; add 1/2 cup strained lemon juice. Fold in 4 beaten egg whites and freeze in refrigerator trays about 4 hours.

Baked Apples With Rum
Core medium sized apples and peel one ring off top of apple. Fill cavity with seedless raisins, put a liberal spoonful of sugar on peeled top and over raisins, and pour over a tablespoon of rum or a teaspoon rum extract. Bake in moderate oven 350 degrees F, until apples are soft.

Bride's Never Fail Cake
Sift two cups flour, then put back in sifter and add 2 teaspoons baking powder and 1/4 teaspoon salt. Cream about 4 tablespoons of butter thoroughly, add 1 cup sugar and cream together until light and fluffy. Add one unbeaten egg, then add flour and 1/2 cup milk alternately. Add 1 teaspoon vanilla. Bake in well greased square pan for approximately 45-50 minutes at 350 degrees F. Ice with butter cream icing, flavored with Seely's orange flavoring.

Oatmeal Macaroons
Mix 1 cup sugar with 1 tablespoon melted shortening; add 2 eggs, one at a time, beating well after each addition; add 2 1/2 cups rolled oats, 2 teaspoons baking powder, 1/2 teaspoon salt and 1 teaspoon vanilla. Mix well. Drop on greased tins about 1/2 teaspoon to each macaroon, allowing enough space for spreading. Bake in moderate oven at 375 degrees F, for about 10 minutes.

Orange Puffs
Cream 1/2 cup butter and add 1/2 cup sugar gradually. Add 2 egg yolks, one at a time, and beat well. Mix and sift 1 cup cake flour, 1 teaspoon Royal Baking powder and 1/4 teaspoon salt. Add alternately to first mixture dry ingredients and 1/4 cup of orange juice, beginning and ending with the flour mixture. Fold in 2 egg whites, stiffly beaten, and

place in greased muffin tins. Bake in moderate hot oven 350 degrees F, for approximately 25 minutes.

Peach Anzora
Dissolve 2 packages of Royal gelatine (raspberry) in 2 cups boiling water; add two cups cold water. Measure one cup of this mixture and pour into small bowl or pan and chill until firm. Chill remaining mixture until it begins to thicken, then whip until light and frothy. Pour into ring mold and chill until firm. To serve, unmold and fill center with sliced peaches and chopped, clear gelatine. Top with whipped cream and a pecan.

Tossed Salad
Cut crisp and cold lettuce into salad bowl. Add tomatoes (fresh) cut in slices, onion minced, celery and sliced radishes, sprinkle with salt and pour over it lemon juice and olive oil. Toss until well blended. Chill and serve on bed of endive or lettuce.

Fruit Salad
Cut up banana, apple, orange and any other fruits you may have on hand (if canned fruits are used have them well drained). Chop some walnuts or pecans and put all in bowl and sprinkle well with sugar. Let set a few minutes while you thin mayonnaise with whipped cream. Pour thinned mayonnaise over fruit and marinate well. Mound on lettuce and put a dash of thick mayonnaise on top. Place whole pecan or marachino cherry on top.

Butterfly Salad
Cut slices of pineapple in half and lay both halves on lettuce so that the hole is on the outside. Where the two curves meet, form molded cheese to represent the body of a butterfly. (This may be rolled in finely chopped nuts. Mark the lines of the wings with thin strips of red pepper or pimiento. Mark his feelers with two strips of green pepper. Serve the dressing separately.

Calavo-Tuna Salad
Flake Italian style tuna fish (packed in olive oil) add chopped celery and enough salad dressing to which a tablespoon of chili sauce has been added to thoroughly marinate.

Chill thoroughly. Select ripe calavo, cut in halves, remove stone and chill. Fill hollow with salad mixture, top with mayonnaise. Put pecan on top. Serve with sprigs of watercress (crisp watercress in water). Hot biscuits are served with the salad.

Delicious Refrigerator Cookies
1/2 cup granulated sugar
1/2 cup brown sugar
1/2 cup shortening
1 egg
1 1/4 cup flour
1 teaspoon vanilla
1/2 cup pecans
Cream shortening, sugar and egg together. Add sifted dry ingredients and nuts. Add flavoring. Roll up in rolls. Let stand in refrigerator several hours. Slice and put on cookie sheet in 400 degree F oven for 10-12 minutes.

Icebox Cookies
3/4 cup lard
1/2 cup butter
1 cup granulated sugar
2 cups brown sugar
3 eggs
4 1/2 cups flour
1 teaspoon salt
1 teaspoon baking soda.
1 teaspoon cinnamon
1/2 cup chopped pecans
Cream lard, butter, sugars and egg together. Sift all dry ingredients and add to creamed mixture. Add nuts. Roll and let stand several hours. Slice and put on cookie sheet. Bake in 400 degree F oven for 10-12 minutes.

Refrigerator Cookies
1 cup butter
2 cups brown sugar
2 eggs
1 teaspoon soda
1/2 teaspoon salt
1 cup chopped nuts
3 1/2 cups flour
Cream the shortening and sugar thoroughly, add the eggs, continue to beat. Sift the flour, salt and soda three times and add with nuts to the first mixture. Pack in mold or roll and leave in refrigerator all night. Slice thin as possible. Bake

at 400 degrees F. The recipe makes about 5 dozen.

This ends the recipes. Next week I'll tell you about the equipment I used during the demonstration.

Police Radio Planned by Deerfield Board

Deerfield anticipates a police radio in the near future with connections from the sheriff's office in Waukegan to the Deerfield village offices and the local police car. Carleton Scribner, village trustee, was appointed at the last meeting of the village board by Mayor Harry E. Wing to look into the matter with power to act.

Because Corporation Counsel George McGaughey was not present, members of the board put off the Eastern Standard Time question for the special meeting to be held later. Undoubtedly Deerfield will fall in line with neighboring suburbs in accepting Chicago's time.

Taverns have been limited to two instead of three and the yearly license fee has been increased from \$400 to \$500, giving Deerfield a revenue of \$1,000.

The board appropriated \$50 for expenses on the community skating rink.

Chief of Police Percy McLaughlin was instructed to warn local motorists that March 15 is the deadline and vehicle licenses, now lowered to \$3.00, must be purchased before that date.

Two motions were seconded for George Page, village treasurer, and Florence Page, village collector, concerning their bonds and the Deerfield State Bank as depository.

So much difficulty has been encountered by frozen water mains and pipes that the board specified that the village would pay for the thawing of pipes outside the house only on the first call, but if summoned again the bill would be

charged against the water consumer. Present at the meeting on Feb. 11 were Mayor Wing, Trustees Marshall Pottenger, Monroe McKillip, Ralph Peterson, C. S. Scribner,

George Page and C. M. Willman and Village Clerk Chester Wessling. The audience for the winter meetings have not been large because of the severe weather.

CHRISTIAN SCIENCE READING ROOM

42 NORTH SHERIDAN ROAD
Open: WEEK DAYS 9 a.m. to 6 p.m.
SATURDAY 9 a.m. to 9 p.m.
SUNDAYS 2:30 to 5:30 for reading only.
You are cordially invited to visit the Reading Room, where the Bible and authorized Christian Science literature may be read, borrowed or purchased.

A Home is a Progressive Thing

THERE is little difference in spirit between the pioneer chopping timber for his new home in the wilderness and the modern couple scanning "Lots for Sale" ads, or consulting with architects.

After a home is established, it may grow and develop with the progressive fortunes of the family it shelters.

When the first baby is born, a family must move to larger quarters. "We'd like to get out of the apartment on account of the baby," they say. Step by step they go on planning and adding improvements to their home.

But—the modern family has a new and unique advantage born with modern times and the adversity of the depression years. While saws and hammers were idle, the creative minds of home-builders and home-makers have been intensely active.

There are new ideas of home design that start from the inside of the home where people eat, live, sleep and play. There are new building materials, new furnishings, better lighting, insulation, automatic gas heating, air cooling, cleaning and humidification, refrigeration and so on through a

vast range of equipment that contributes to health, leisure and comfort of the family.

For instance, families who have installed gas heat, and there are thousands of them in the Chicagoland area, have brought a new comfort and convenience to their homes which would have been almost unbelievable a few years ago.

Now, more than ever before, a home can be shaped to embrace the family's changing needs. The wide range and flexibility of the new art of home building let you add step by step according to your own plans made in advance. Your new home can start from small beginnings and you can have the fun of planning it and watching it grow.

Fresh air, pleasant neighbors, community life, the color of growing things seen through the window are all of a substance with HOME, and must be considered as one of the first steps in home planning.

In the Chicagoland area served by this Company, there are thousands of beautiful home sites along the countryside, in delightful little towns more removed from the metropolitan area but within easy access by fast transportation, or in suburbs border-

ing the city. This diversified area offers an almost unlimited selection for home requirements, close to the "good earth" but plentifully provided with modern comforts and excellent transportation.

If you are contemplating a home in the attractive residential area served by this Company, give us a chance to help you in planning for your electric or gas service requirements. We can also give you preliminary estimates—perhaps helpful ideas—on other features of modern homes: automatic gas heating—insulation—air conditioning—modern kitchens—modern laundries and basement recreation rooms—latest lighting and wiring improvements and other conveniences that increase the comfort of living. We will be glad to consult with you, your architect or your contractor. Inquire at any of our offices, or write—
