SYNOPSIS OF LECTURE ON CHRISTIAN SCIENCE

Given Friday Evening at Elm Place School Auditorium by Chas. V. Winn, C.S.B.

Following is a synopsis of the lecture on Christian Science by Charles V. Winn, C.S.B., of Pasadena, Calif., a member of the Board of Lectureship of the Mother Church, The First Church of Christ Scientist in Boston, Mass. The lecture was given Friday evening in the Elm Place school auditorium.

Mankind is ever marching forward and onward. Humanity is continuously striving to overcome its boundaries and limitations. It makes ceaseless efforts to attain a greater degree of progress and to gain a fuller light on its varied problems. On page 233 of the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, we find this most helpful truth: "Progress is the law of God." To stand still is impossible. We are ever marching toward the light of Truth. Christian Science not only declares this eternal fact but shows us clearly why it cannot be otherwise. It teaches us exact Science, an understanding of which fulfills every righteous hope, brings to fruition every honest desire, crowns every true purpose with success.

Progress Through Enlightenment
 In the Bible we read, "The people that walked in darkness have seen a great light: they that dwell in the land of the shadow of death, upon them hath the light shined." All progress has been made through more light, that is, through an increased or fuller understanding of that which is true and a greater freedom from the false and wrong. The onward urge must always be the outcome of a clearer perception of that which is true and a keener discernment of the falsity of the wrong. The light of Truth never changes divine facts; it reveals them to our uplifted gaze.

God Is Truth
 In the Christian Science textbook (p. 312) we read this definition of Deity: "God is Truth." We also learn in the Scriptures that God is the only creator, that He is the author and source of all that is real and actual. The Apostle John thus clearly states this fact: "All things were made by him; and without him was not any thing made that was made." Since God is infinite Truth and the only creator, all that He creates is truthful, truth-like, and expresses divine Truth. That which proceeds from Truth must express the divine character of Truth; it must abide in the light of Truth. As we understand God aright the light of Truth illumines our thinking; truthful concepts fill our consciousness; truthful ideas are our constant companions. As the mist disappears before the light of the sun, so the shadows of untruthful concepts must dissolve under the rays of Truth. A wise man of old prayed for an understanding heart. He well knew that as he understood that which is true he would judge righteously and well. True knowledge leads to truthful thinking and truthful acting. A perception of the Science of Truth must lead in the paths of Truth; it

leads in no other direction. We read in Proverbs, "Understanding is a wellspring of life unto him that hath it." The light of Truth reveals that which God has created; it destroys the belief in any other creation.

D.A.R. BETTER FILMS COMMITTEE REVIEW

"Mutiny on the Bounty." Cast: Charles Laughton, Clark Gable, Franchot Tone, Herbert Murdin. Feb. 27, Thursday. From the novel by Charles Nordhoff and James Norman Hall. "Mutiny on the Bounty" is certainly one of the highlights of cinema achievement—a man's picture. Here is a picture that is not only virile and thrilling but absorbing in its presentation of a particular incident bearing upon a universal problem. "Mutiny on the Bounty" has everything—humor, romance. The production standards are the highest; exquisite and effective photographs, fine cast. Robust imaginative directing and a strong, vivid story. Mature family.

"The Three Musketeers." Cast: Walter Abel, Paul Lukas, Margot Grahame, Heather Angel. Feb. 28-29, Friday-Saturday. Based on Dumas' notable classic. This historical drama of court intrigue during the reign of Louis XIII is an artistic and lavishly spectacular production. It is directed and acted with rare understanding and skill and beautifully costumed. In all a most stimulating and entertaining picture. Family.

"Frisco Kid." Cast: James Cagney, Margaret Lindsey, Ricardo Cortez, Lili Damita. A robust tale of the Barbary Coast and its code of "dog eat dog." "Bat" Morgan beams through futility of expecting that money or political power gained under this code would bring happiness or love. It is constructively shown how vigilante law was born out of chaotic lawlessness. An absorbing story excellently directed and cast with many thrilling episodes and sequences of human interest. Adults.

"Bad Boy." Cast: James Dunn, Dorothy Wilson and Louise Fazenda. March 4-5, Wednesday-Thursday. Vina Delmar's story of young love and the obstacles encountered in the world today—such as parental objection, unemployment and the handicap of having to discontinue education in order to go out and earn a living. Family.

Mrs. Quincy Wright Speaks Before Ravinia Woman's Club Wed.

The Highland Park League of Women Voters met last Wednesday evening at the Ravinia Village House with a large attendance in spite of the cold weather. Mrs. Jay Glidden, president, presided.

Mrs. Carroll Binder, chairman of the program committee, introduced the speaker, Mrs. Quincy Wright, who is department chairman in government and international co-operation of the National League of Women Voters.

Mrs. Wright discussed the new neutrality legislation under consideration in Washington. She said in part: "Now is the time to find a new term for the policy of neutrality. As it stands now, neutrality is a save your own skin policy. The shipment of raw materials is a stumbling block, if there was a complete redistribution of trade it would hurt some, help others."

"The traditional freedom of the seas is growing less and less. Right now the legislators should work longer and harder at neutrality and find a system to satisfy everybody. The question has been put by until next January. As yet, there is no public opinion to support it. If the American public insists on taking opinions into their own hands there has to be more time and more thought devoted to this important subject."

The meeting was open to questions and many people took part.

Dudley Crafts Watson

Dudley Crafts Watson, world traveler and interesting lecturer on home lore, talks on the Public Service Company of Northern Illinois radio program Wednesday evenings at 9:30 over WGN. His subject is home planning and decoration and he answers questions from listeners about home making problems.

High School Students Get Courtesy Tests

Courtesy tests for the purpose of instructing students in proper etiquette were given last week at the Highland Park high school. The results of these tests show that the girls are superior to the boys as far as knowledge of proper etiquette goes. This is the second test given on this subject.

High grades were made by: Elsie Dahl, senior, and Jeul Stryker, sophomore, who led the school with scores of 94. Lorene Lindstrom, Ruth Smith, Dorothy Einbecker, Elaine Ball, Virginia Sherwin, Bernice Gossweiler, Margaret Tosi, Jil Lowenstein, Florence Rice, Dorothy Doseh, Pat Reading, Catharine Jones, Vera Greene, Barbara Gallup, Enid Brooks, Antoinette Pantelis, Mary Heed, and Julia King made the highest scores of the girls.

High scorer for the boys was David Kinderman, junior, who came through with a score of 90. Other high scores were made by George Lanzl, Earl Knaak, David Pasquesi, Arthur Pieg, Dave Allison, Howard O'Donnell, Chandler Kettner, Francis O'Connor, Charles Burnett, Alex McEwan, John Engstrom, and Newton Hoffman.

Housing Shortage Is Developing in U. S.

That a housing shortage is now developing throughout the United States is suggested by the fact that real estate foreclosures during the last three months of 1935 showed a decline of more than 18 per cent from the corresponding period of 1934. The total real estate foreclosures during the entire year of 1935 were by a small margin lowest in any of the past four full years. These figures were obtained by the National Emergency Council from the Federal Home Loan Bank board's survey, which embraced 890 identical communities throughout the 48 states.
