"PAINLESS" TAXES REALLY HURT

by Raymond Pitcairn
 National Chairman
 Sentinels of the Republic

During recent months America has heard a growing volume of protest against the so-called "painless taxes."

That is the term used by politicians to describe those taxes which are not levied directly, but are hidden, instead, in the cost of food, shelter and other necessities. The theory is that what the average citizen doesn't know about the costs of government won't hurt him—and that it won't hurt the officials who fix those costs, either.

But unfortunately for the theory, such taxes are beginning to attain a high degree of visibility. For a while they were discernible only in the rising cost of living. Now they have come more clearly into the light. A recently published analysis of Federal income sources tells the story much as follows:

In 1932, direct taxes (on income, corporations, etc.) produced 58 1/2 per cent of our Federal revenue, while indirect taxes (baked into your bread and woven into your clothes) produced 41 1/4 per cent—approximately \$782,900,000.

In 1933, direct taxes produced only 42 per cent of our revenue, while indirect taxes climbed to 58 per cent—approximately \$1,091,000,000.

In 1934, direct taxes produced 34 per cent of our Federal income, while indirect taxes soared to 66 per cent. But the total of invisible taxes continued to soar. It rose to approximately \$2,234,800,000.

Who paid those taxes hidden in the cost of living? The rich? To a minor degree. But the overwhelming share was paid by that huge majority of average citizens who labor to buy food and clothes and shelter for themselves and their families. And the larger the family, the higher the bill.

To whom, then, are hidden taxes "painless"? To no one, it would seem. And certainly not to the great body of American workers and earners who continue to pay them in the form of rising prices for almost everything they buy.

HOW'S YOUR AIM?

Not so good? Can't make the basket the way you'd like to? Maybe it hasn't anything to do with your muscles at all; maybe it's your eyes! A lot of famous athletes wouldn't be so famous without their glasses, you know. Why not drop in before practice starts and let us give your eyes the once-over? Know their condition, don't just "guess" they're OK! P.S. We have lenses and frames so strong they'll weather every stiff game you take 'em into.
