HATS WITH THE Master Master Gardener

1. Planning Your Garden

Probably the most important step Of course, people who garden in a all right, but its been my experience member about your soil. Your that sound planning pays real divi- growing things depend on it to dends in extra beauty. One friend supply them eleven different food of mine-a man who's famous in elements, every one of which his community for the wonderful essential for healthy growth. From effects he gets in just a small space time to time these food elements betold me he always knows exactly come exhausted from the soil and what he's going to do with every have to be replaced . . . because square foot of his garden before growing plants, just like growing he turns the first forkful of earth. children, can't be strong and healthy do in planning a garden would be To avoid all risk, I feed my garden to make a map of it on a big sheet a complete plant food-one that I carefully to scale, so as not to over- of the needed food elements in scilook any space that could contribute entifically balanced proporitions. It to the beauty of my garden. On pays to give everything you grow this map I'd locate the permanent a square meal. things, such as trees, shrubberey, and the house. If you have a pool Home Modernization or a rock garden, put them into the map too. Then, around these, plan the sizes and shapes of the

One of the best ways I know to get gardening ideas is to read seed catalogs. They'll not only give you a wonderful selection of flowers and plants to choose from, but they'll give you a very good idea as to which are best suited for the climate you live in, which will grow best in your kind of soil, when you should plant each variety, and when you can expect each one to blossom.

When I read seed catalogs I keep a list of the flowers and other plants that appeal to me. And I'm always careful to include some new flowers that I haven't grown before. I've found that one of the most delightful experiences in gardening is in finding new faces in my flower beds each year. It's just like making new friends!

When you have decided on the flowers you're going to grow, the next thing to do is to plot on that

Easiest Way to Choke Weeds

The easiest, surest way to get rid of weeds is to make your grass choke

Grass starts up earlier in the spring than weeds. If it gets a square mea ust as soon as frost is out of the ground, the grass will get such a strong head start that later, when weeds start up, they'll find little room to grow.

But the kind of thick, dense turf that hokes out weeds results only from eeding with a complete plant food-a food that supplies all eleven of the food elements grass needs from the soil Bone meal, manures and sewage fertilizers supply only a few of these vital

To eliminate all risk of failure from partial starvation, feed VIGORO. Vigoro supplies all eleven of the necessary elements-supplies them in scientifically balanced proportions. Sure . . . and economical. You can get it from your local garden supply dealer.

USE THE COMPLETE PLANT FOOD Supplies all eleven food elements needed from soil

map of yours where you're going to put each variety and how much space you can budget for each. There are a number of things to keep in mind. Some flowers grow a lot taller than others, and the shorter ones have to be out in front where they can be seen. And since flowers don't all blossom at the same season, each flower bed should be planned so that it will have pleasing variety of flowers in bloom at all times through the summer. n making a garden is planning it. Color combinations have to be con

Here's an important thing to re If I were you, the first thing I'd without a complete balanced diet. of paper. And I'd make it pretty can be sure will supply all eleven

Movement Gains Ground Monthly

With the home modernization movement gaining ground each month, there is undeniable evidencethat the word "obsolete" can be used in describing fewer and fewer homes. Not only are the exteriors interiors of homes being brought up to date, but home equipment is being given a generous share of a family's attention.

Women, of course, have a vital interest in their kitchen and with homemakers this room is among the first to be included in a home modernization program. Many new advantages are offered to women in modern cooking and refrigeration appliances; advantages that have been developed in recent years and not found in kitchens heretofore.

These advantages constantly are becoming more widely recognized, according to the North Shore Gas Company, with the result that gas cooking and gas refrigeration are more popular than ever. The gas company has inaugurated an unusually easy payment plan for the made, delivered and set in place in sive and is convenient to the front installation of gas ranges, gas rethat has been the means of bringing these modern services to many

Public Service Gives Home Building Exhibit

A novel home building and modernization exhibit in which building conditions have been duplicated indoors, is now going the Public Service Company's Evanston store, 911 Church street

"We are inviting people this exhibit," said J. W. division manager of the company it a helpful and practical source of information on modern kit basement recreation rooms

"Placing ourselves in the position of a family about to build a home, tects with instructions to arrange and equip the rooms according to the latest practical developments in the irt o building. Local carpenters, flumb ers and builders did all this con struction and installation of equipment. Equipment and materials were furnished from local cources with the exception of the cobinets for the kitchen. These were Abtained from the St. Charles Cabinet company. The architects are Maher and MacGrew of Evanston.

"In place of conventional displays, the exhibit on the first floor consists of a modern kitchen, gerving

pantry and breakfast nook, surrounded by regular walls of dimensions ordinarily found in a home In addition, a section of the store's pasement has been modernized in of a home would be treated.

"Not only have we built a realistic display of modern gas and electric equipment, but we also have tried to show its flexibility. Whatever the home builder's budget, he modern conveniences than ago. Modernization doesn't have to be done all at one time. New home comforts can be added step by step as the homemaker is able to afford them. We believe this fact is apparent throughout the exhibit," concluded Mr. Kehoe.
