AMERICAN HOMEOWNERS SAVE THOUSANDS OF DOLLARS EVERY YEAR

TRY THIS SIMPLE MATCH TEST... SEE FOR YOURSELF HOW A CRANE BOILER SAVES YOU MONEY...

NO-MONEY-DOWN PLAN

Take an ordinary match and light it. Place the palm of your hand beside the flame. It's warm. Now place the palm of your hand over the flame. It's hot.

That explains the secret of Crane comfort and economy. Crane boilers have about 50% more heat-absorbing surface directly over the heating gases than the average boiler. Further, patented baffles direct the water over the hottest part of the boiler.

In that way more heat is taken from a given amount of fuel and carried to the rooms of your home.

That's why it takes less fuel and costs less money to heat your home with a Crane boiler.

"Our new Crane Boiler is easy to run, seems to hold the fire longer, and we don't burn as much fuel as we used to."

H. C. WEICOLD, Mt. Lebanon, Pa.

Figure a saving like that on your yearly fuel bill and see if it isn't well worth looking into.

FREE Estimate

Ask any responsible heating contractor for complete information on how you can enjoy Crane comfort and save real money on fuel. He will make a survey and give a free estimate upon request. Mail coupon for full details on Crane Heating Systems.

CRANE CO., 1224 Emerson Street Evanston, Ill.

I'd like to have more facts about CRANE Boilers that save fuel money, and how I can get one put in on the no-money-down plan. I understand that this inquiry places me under no obligation whatever.

DO YOUR HEATING DOLLARS GO UP IN SMOKE?

There's lots of heat in the fuel you buy. But whether it is carried to the rooms in your home or wasted on the way depends upon the heating system.

And as long as you're paying for the heat why not get plenty of it?

In fact you'll probably save enough on your fuel bills to pay for a new Crane Boiler and have some left. It happens all the time, Crane owners tell us!
