YOU SHOULD BE AFRAID OF THE DARK

Because it feels an obligation to continuously explore and demonstrate new and worth while developments in the use of electricity for personal or public welfare, the Public Service Company of Northern Illinois has undertaken a new and unusual installation of highway lighting, extending for about a mile on Skokie Highway, south of Dundee Road in Northbrook, Illinois. This lighting, installed by the Public Service Company of Northern Illinois in cooperation with the Village of Northbrook as a contribution toward safety on the highways, is a practical demonstration of the fact that proper illumination is a positive influence in the lessening of automobile accidents. It was turned on for the first time this week, under the auspices of

THE CHICAGO SAFETY COUNCIL

Although much good is being derived from the attention given to the appalling toll of fatalities resulting from automobile accidents generally, it is not widely known that the hazard is about six times greater in driving a car after nightfall than it is during the day. Lack of proper visibility, whether from glaring headlights, insufficient lighting of the street or highway, or from other sources, is the major cause of 60% of the automobile fatalities now occurring throughout the Country. Proper highway illumination, of which our new Skokie Highway demonstration is one of several approved methods, can help eliminate this mounting tragedy.

We invite you to see this new lighting and judge its value for yourself.
