COAL AND OIL USERS AMAZED AT BIG DROP IN FUEL BILLS

CRANE BOILERS Give Homeowners Better Heat for Less Money

The hot gases from the burning fuel pass directly underneath 50% more "ceiling" surface in a Crane Boiler than in the average boiler. Further, patented baffles direct the water over the hottest part of the boiler.

That's why a Crane Boiler takes so much more heat out of a given amount of fuel and pours it into the rooms of your home.

You can see in a second how true this is if you hold a lighted match beside your hand, then right under it.

First you feel warmth. Then you feel intense heat. Crane Boilers have more heat-absorbing surface directly over the heating gases.

"We are greatly pleased with this boiler and believe that you should be commended for manufacturing such a splendid piece of equipment."
CHARLES S. CORSE, Vienna, Va.

You too, can enjoy Crane comfort and economy in your home. And if your fuel bills are high now, you'll probably find that you'll save enough to help pay for a Crane Boiler.

WHY PAY FOR HEAT YOU DON'T GET?

If you own an old-fashioned heating system, you're probably paying good money for lots of heat you don't get. This heat you're not getting goes up the flue or out with the ashes... and your money along with it.

If you could just measure the big part of every heating dollar that's absolute waste, you probably wouldn't stand for it. So why not face the facts and put your heating budget "in the black" right now.

Easy Payments—No Money Down

You can install a new Crane Boiler—or an entire new Crane Heating System—in your home without paying a single cent down.

And the cost can be spread over three years, at government-approved rates.

Call on a responsible heating contractor or mail the coupon today. Start now to cut your heating bills down to their right size.
