You can build beautifully..... and so economically with CONCRETE

Take the plans of that home you've dreamed of and bring them to reality, with concrete. Then you'll have something! For concrete brings added beauty to any architectural style; gives you a choice from a wide range of warm colors and interesting surface textures.

Concrete homes are proof against fire and storm, termites and decay. They're snug and dry in winter, cool in summer. They're always livable and trouble-free—floors do not crack or sag, plaster does not crack, doors and windows do not bind.

The cost? It's surprisingly low. Payments on the average home are only a few dollars per month more for concrete than for ordinary non-fireproof construction. In the long run, it will probably cost you less to own a concrete home.
