*"What's new and exciting at the Auto Show?"*  
*"I'll answer you in one word—PACKARD!"*

1. "Take my advice and make a bee line for the Packard space as soon as you get to the Show! You'll find two brand-new cars that will give you the thrill of a lifetime—the new Packard Six and the new Packard Eight."

2. "Packard's crammed more real improvements into those cars than you'll see over a five-year period! There's an entirely new rear suspension, a new type of all-steel body insulated like a radio studio, new body lines."

3. "But look sharp, or you'll mistake the new Six and Eight for the big expensive Packards. They've stepped up the wheelbase of both the Six and Eight by seven inches! Are they the big, streamlined beauties!"

4. "Sure, I ordered one. Why, the monthly payments run only a few dollars more than on the smaller car I intended buying. And I plan to keep the Packard at least a year longer, so I'll be money ahead in the end."

The new 1938 Packard Six, 122 inches in wheelbase—a big, handsomely-trimmed car that is typical of Packard's astonishing dollar-values for 1938

**Here's the 1938 Packard news in a nut-shell**

- Both Packard Six and Packard Eight seven full inches longer in wheelbase... much wider bodies... bigger trunks.
- New type all-steel body that is really quiet—result of long research with great University.
- Entirely new type of rear suspension—Packard's exclusively. Makes possible gentlest and safest ride ever built into a motor car.
- A Chassis that needs lubrication only twice a year—and then at never more than 16 points.
- New, more beautiful treatment of the famous Packard lines, the lines that keep your car in style, not for just a season, but for years.

By all means, see these new Packards. Even more important—don't miss driving one!
