

2 Cars, New Truck In 1938 Ford Line

An advance showing of 1938 Ford V-8 cars and trucks opened this afternoon at the Ford Metropolitan showrooms at 1710 Broadway, New York City.

Two distinct Ford V-8 cars, differing in appearance, appointments and price, were presented. One was the de luxe Ford V-8, the other the standard Ford V-8.

The standard car is designed for owners to whom economy in first cost and operating cost is paramount. The de luxe car provides added luxury and style for those who desire them.

Both cars have the same V-8 chassis. The eight de luxe types are available only with the 85 horsepower V-8 engine, the three standard types with either the 85 horsepower or the 60 horsepower.

The de luxe car is a stylish sister of the standard. It is entirely new in appearance. The radiator grille is of new design. Appearance of the hood is longer and more sweeping. Fenders are massive. Interior appointments are in keeping with the styling of the exterior.

The standard V-8 cars reveal new styling, with a different radiator grille design, long hood and flowing contours. The spacious interiors are roomy and attractively upholstered and appointed.

A new group of "one-tonner" trucks also is offered, in addition to the 112-inch commercial cars and the 134-inch wheelbase trucks.

The new "one-tonner" trucks also is offered, in addition to the 112-inch commercial cars and the 134-inch wheelbase trucks.

The new "one-tonner" is designed

specifically to bridge the gap between the commercial cars and the truck groups and are available with either 85 horsepower or 60 horsepower engine.

Chevrolet Sets New High 1938 Sales Quota

Officials of the General Motors Corporation have elected to sponsor the Chevrolet Division for 1938, to give special attention to the plans and programs of the largest unit of the corporation and to aid Chevrolet in every possible way during the coming year to attain its objective of new car and truck sales.

A. P. Sloan Jr. and W. S. Knudsen, chairman of the General Motors Board, and President, respectively, have communicated with the more than 300,000 shareholders of the corporation, telling why General Motors is officially sponsoring Chevrolet for the new model year that started this week with the opening of the New York Automobile Show.

They complimented M. E. Coyle, Chevrolet general manager, and W. E. Holler, general sales manager, for the large growth of the company during the past four years and pointed out that Chevrolet is now a million-car-per-year company with sales of 1,015,000 for 1937 and 1,168,000 for 1936.

"What Chevrolet does in any given year," said Sloan, "is of vital importance, not only to General Motors and the Chevrolet Division, its dealers and retail salesmen, but also to business in general, for Chevrolet's operations are so large and extensive as to have a marked influence on the welfare and the lives of millions."

Knudsen stressed service to public through the Chevrolet dealers, as

he commented upon the fact that the corporation is backing Chevrolet in 1938 with its power and ability. "In its unique position as the leader in the low-priced field," he said, "I know that the Chevrolet Division will accept the challenge that leadership brings, namely, maintaining its leadership in service to the public through the Chevrolet dealer organization."

The new Chevrolets are on display at the Deerpath Garage, Lake Forest Chevrolet dealer.

Safety education is a very important item in our schools today. It should be taught to all classes. Teaching or preaching safety, however, is not enough. If the only thing a child gets out of safety education is a bundle of facts he can recite to the teacher or visitors, I don't believe we have taught him a thing.

That is the thought. Cultivate safe habits in the children through safety education. Safety education must, of course, be based on intelligence, facts, and ideals, but it must have coupled with that desirable and safe habits.

Safety education is a conception of life or a state of mind. It must, however, at the same time create a machine or a thought for building efficient and safe conduct.
