A free public reading room is maintained by this church at 43 N. Sheridan road, which is open daily from 9 o'clock in the morning to 6 in the evening, except on Saturday when it is open from 9 a.m. to 9 p.m.

On Sunday the reading room is open from 2:30 to 5:30. Here the Bible and all authorized Christian Science literature may be read, borrowed, or purchased.

All are cordially invited to attend the services and make use of the reading room.

CHRISTIAN SCIENCE CHURCHES

"Mortals and Immortals" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, November 14.

The Golden Text was, "Because ye are sons, God hath sent forth the Spirit of his Son into your hearts, crying, Abba, Father. Wherefore thou art no more a servant, but a son; and if a son, then an heir of God through Christ" (Galatians 4:6, 7).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "As for man, his days are as grass: as a flower of the field, so he flourisheth. For the wind passeth over it and it is gone; and the place thereof shall know it no more. But the mercy of the Lord is from everlasting to everlasting upon them that fear him, and his righteousness unto children's children: To such as keep his covenant, and to those that remember his commandments to do them" (Psalms 103:15-18).

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Mortal man is the antipode of immortal man in origin, in existence, and in his relation to God" (215:24).

Build Termites out of your new home with CONCRETE

The U. S Department of Agriculture says that termite damage in small homes may run into hundreds of dollars. But there is nothing in a firesafe concrete house that termites can destroy. From foundation to chimney cap it is immune to insect boring.

Of course, you can have concrete! The first cost of this quality construction is surprisingly low and it saves on insurance, saves on depreciation, saves on upkeep charges.

Build with concrete from the ground up. Concrete suits any style—Spanish, Ranch House, Colonial, Modern. Choose your own color and finish. And be sure to have concrete floors. They're quiet and firesafe, and they take any kind of covering—wood, carpet, linoleum, terrazzo, or simply colored and waxed.

Remember, concrete homes are warm in winter, cool in summer, and they endure for generations of happy, carefree living.

HOW TO GET A CONCRETE HOME

1. Phone or write a nearby concrete products man or concrete contractor for the names of architects and builders experienced in concrete.
2. Select an architect familiar with concrete construction and tell him you want concrete walls and floors and a firesafe roof.
3. Have your plans figured by builders experienced in concrete construction. Let nothing shake your determination to obtain the best value for your home building dollar in today's market . . . A FIRESAFE CONCRETE HOME.
