Let the Doctor Help Through the Pre-natal Period.

MAKING DREAMS MORE PLEASANT

When a woman dreams of her baby, in these days of advanced obstetrical knowledge and practice, there is not the same fear present in her mind that women have always had to bear. Pre-natal care and attention by the Doctor, fits the mother physically for her ordeal. Proper diet and supervised exercise and recreation insure the health of the child.

When the baby arrives under expert guidance, in hygienic surroundings, with every scientific aid to allay pain and temper the danger, the mother's dreams are more pleasant - to say nothing of the fears of the father - and the welfare of the baby.
