Michael F. Gallagher and his little granddaughter, Ina Butland, are looking forward to being joined next month by Ina's mother, Mrs. Charles Butland, and her infant son, Mike, who are sailing on May 27 on the Empress of Japan from Hongkong. A recent air raid on Changsha, where Mr. Butland's business is located, made the former Garrigue Gallagher decide that she and Mike would fly to Hongkong to take ship for this country. Mr. Butland will join them as soon as he is able to wind up his business in China.

Ina, who is not quite three, has crossed the Pacific five times, for she was born in China, and before she and her nurse arrived a month or two ago to join Mr. Gallagher she had come with her mother twice to visit here. BEAUTIFY YOUR LAWN

Keep your mower really sharp and easy running by having it sharpened by machinery.

A sharp mower is easy to push. Cutting grass with it is a pleasure instead of a drudgery. More than that, a really sharp mower shears the grass, clipping it off smoothly and evenly so that your lawn will always show a surface of unbroken velvety green.

Nothing damages and ruins a lawn so quickly as a dull mower. Not only does it leave your lawn ragged in appearance but it literally tears the grass out by the roots, doing damage that will take an entire season to repair.

We sharpen your mower on the Ideal Lawnmower Sharpener. This is a scientific machine designed especially for sharpening lawnmowers. It holds the blades of the mower in position so that each blade is sharpened evenly to a razor-like edge and with just the right clearance to obtain the cleanest cut with the least wear - something that cannot be done with a file or emery dust.

The Ideal Way makes your mower cut better, run easier and last longer. When your mower needs sharpening, give us a call.
