FOR SAFETY'S SAKE INSIST ON CONCRETE for all streets

Many accidents on the streets are caused by pavements that are bumpy, raveled, slippery when wet, difficult to clean, obscure at night. These accidents can be prevented by paving with concrete which:

1. Reduces skidding in all weather
2. Has high visibility at night
3. Keeps a true and even surface, free from bumps
4. Drains and dries quickly; no pockets of standing water or mud
5. Encourages traffic to use the full street width—passing is easier

Concrete costs less to build than any other pavement of equal load carrying capacity—costs far less to maintain—cuts motoring costs. Don't be satisfied with less than clean, safe, enduring concrete on your streets.

For concrete pavement facts, write to PORTLAND CEMENT ASSOCIATION 33 W. Grand Ave., Chicago, Ill.

A national organization of engineers and scientists, working in laboratory and field to improve and extend the uses of concrete.
