## GUARDING YOUR LOVED ONES

A marvelous contribution by Medical Science, to the happiness of the average household, has been made in modern Health Education.

Fathers take more systematic care of their own health, and check up periodically, either with the family physician or through the Life Insurance examiner.

Happier Mothers, whose physical well-being is looked after with understanding before, during and after the coming of the children.

Children who are fed, clothed, exercised and generally reared with an adequate appreciation of the value of good health.

Have you been keeping up with what this kind of "guarding" is doing for the nation? Years of activity and health are being added to human life.

From every standpoint it is well worth your while to guard your health.
