Give yourself and your family cooler bedtime comfort this summer with an Attic Fan Nighttime Cooling System. Here's how simply it works: Open your windows in the cool of the evening. With the Attic Cooling System at work, out goes the hot daytime air and the blanket of stuffy air that collects in the attic—and in comes cool, fresh night air, usually 15 to 20 degrees cooler in this part of the country—cool air circulates through the house all you get up. In the morning shut the windows to store up the cool air from the night before. Your house will be cooler 24 hours of the day!

What could be easier to operate? And it's easy to own, too! . . . Ask about the special payment terms on an Attic Cooling System for your home. Visit your Public Service Company office today for complete details.
