## ODELL-CHAPPELL NUPTIALS

The coin belonged to Mrs. Hopkins' mother who received it concealed under a postage stamp on a letter from California in the days before California became a state. Another item loaned the bride by Mrs. Hopkins was an old hankie holder for the little finger, in which she carried a lace handkerchief of her grandmother's. She also wore a diamond lavalliere that belonged to her grandmother, the late Mrs. Jerome Steever, which was given to the bride by her aunt, Miss Miriam Steever.

Miss Odell was lovely in a gown of white slipper satin, with a billowing veil of tulle and carrying a bouquet of gardenias and lilies of the valley. She was given in marriage by her father, Mr. Carl L. Odell.

The service was read by Dr. Herbert McComb Moore, president of Lake Forest college and the wedding march was played by Mr. Werner Wieboldt on the Hammond organ.

**PASTEURIZATION AND STERILIZATION**  
Through research by Doctor Louis Pasteur during the last century, the cause of infection was discovered as being simply contamination from an unclean or germ-laden source. Doctor Joseph Lister thoroughly demonstrated that surgical operations could be performed without infection, by keeping wound, instruments and dressings completely sterile. Unless there is an inner infection, the present day infected operation wound is rare indeed.  
Even Lister with his crude method of sterilizing, reduced the mortality of his operations from every other one to one out of twenty—and that was in 1865.  
Modern obstetrics has especially profited from this discovery by Pasteur and practical application by Lister and others. Almost never is the hospital birth followed by infection.  
Discovery of Pasteurization or sterilization has been one of the greatest gifts from Medical Science, affects us all every hour of the day, and adds to our comfort and well-being—whether we are sick or well.
