Loveton-Farmer Wedding

The beautiful garden of the Richard Farmer home in Bannockburn was the setting for the wedding of their daughter, Virginia, to John Woodrow Loveton of New York, on Monday afternoon at four o'clock, with Dr. Gordon Brachett of the L. F. Presbyterian church reading the service.

A sunny sky enhanced the beauty of the service. The bride wore a frock of white satin and chantilly lace and her tulle veil was held in place with clusters of orange blossom. She carried a shower bouquet of orchids and lilies of the valley. Miss Dicksey Farmer was her sister's maid of honor and the Misses Jane and Kathleen Calkins of Bannockburn were the bridesmaids. All three wore dresses of white organza. Miss Dicksey wore a yellow horse-hair hat and yellow shoes and carried a bouquet of yellow garden flowers. The bridesmaids wore hats and shoes of blue and carried bouquets of delphinium. Carl Frank of New York served the groom as best man. Ushers were Kenneth Delmar of New York and Frederick Gottlieb of Wauwautosa, Wis.

About one hundred seventy-five guests attended the wedding and reception. Mr. and Mrs. Loveton will live in New York, after a honeymoon spent in the north woods.

Attic Fan Night-Time Cooling Brings

SLEEPING-PORCH COMFORT IN EVERY BED ROOM!

Come in for your **FREE Thermometer** . . . Then prove for yourself that it usually is at least 10° to 15° cooler outdoors than in your home at nightfall. (U. S. Weather Bureau statistics show that it averages 20° difference between maximum day temperature and minimum night temperature.)

Corrects Air Conditions Throughout the Entire House

● Come in and get your FREE thermometer. Then compare temperatures for yourself . . . Tests show it is usually from 10° to 15° warmer in your home than outdoors at nightfall. Think of the added comfort for your family when you bring outdoor temperatures into bedrooms during sleeping hours.

That's just what an Attic Fan Night-Time cooling system does—brings you low cost sleeping porch comfort for every bedroom. Because this system corrects air conditions three important ways . . . First, it drives out hot, stale daytime air . . . Second, it draws in cool night air . . . And, third, it cools all rooms with constant circulation.

Here's all you do. Open your windows in the cool of the evening and start the fan. Run it during the night. Then, as temperatures lower hourly outdoors, you get constantly falling temperatures indoors, and your whole family may enjoy refreshing sleep.

How easy it is to operate this system . . . and it's so easy to own, too! Inquire about special payment terms for an Attic Cooling System for your home. Come in today for complete details. Don't forget to ask for a FREE thermometer.
