**Hilander Club To Hear Miss Buzard Tuesday, April 18th**

At their next regular meeting on Tuesday evening, April 18th Hilanders will have an opportunity to hear Miss Minnie Buzard, Principal of Highland Park High School, speak on "Present Trends in Education." As many of the members have children in the high school and grade schools this subject will be of especial interest.

Miss Buzard's advanced studies in the field of education at Columbia University and her personal observation of various types of formal and progressing teaching will enable her to discuss current trends authoritatively. Her record of helpfulness and interest in this community will assure her of an attentive group of listeners.

At this meeting the Nominating Committee will report the nominations of officers for the coming year. The meeting as usual will be held in the Presbyterian Church with the customary pot luck supper at 6:45. As this will probably be one of the most worthwhile and interesting meetings on the club's calendar, members will do well to invite their friends to attend.

**News That's News Horse Hits Auto In Runaway Dash**

When a dog bites a man, it's not news, but if a man bites a dog, that's news. And so with an accident. If a car runs into an animal it may not be news, but when a horse plunges into a car that is really news.

Tuesday afternoon about 3:45 Mr. and Mrs. Harry Rudolph were riding west on Berkeley road, when a riderless horse dashed into the side of their car smashing the glass in their car door. Mrs. Rudolph was cut on her face and elbow, while the horse, which was owned by the G. and K. stables was badly cut and bruised. It's rider, Miss Jane Eitel had been thrown from her horse about a mile north of Berkeley road, and the animal was headed for the stables, when he crashed into the car. Just what damage was caused, Miss Eitel remains untold.

**FED ALL 15 NEEDED ELEMENTS**      **FED ALL BUT MAGNESIUM**

**MORE** important than anything else to the beauty and health of your garden is the plant food you use. For every growing thing—flowers, grass, trees, shrubs, vegetables—demands complete feeding, if the results are to be had. Above you see a stinnia plant that got all eleven food elements needed from the soil. And a plant that received all but one of them. A similar difference occurs when any needed element is missing. Avoid failure! Use VIGORO, the complete plant food that supplies all elements needed from soil. It's odorless, sanitary, easy to apply. See your garden supply dealer.

**Lose Weight Safely**

If you want to take off ugly fat easily and pleasantly all you have to do is—  
**First... eat sensibly, which means you avoid over-eating. Second... mix 1/4 of a glass of Welch's Grape Juice with 3/4 of a glass of water and drink before meals and at bedtime. Thus you reduce caloric intake considerably. But you do not suffer a hungry moment. There are no strenuous exercises or taking drugs. Yet—in a test conducted by Dr. Dammann with this method among a group of intelligent and cooperative people who followed directions implicitly, an average weight loss of seven pounds was registered per month. This remarkable method is just as beneficial and effective for overweight men as it is for overweight women. There is only one thing to watch. Eat sensibly, which means you avoid over-eating and beware to use Welch's Grape Juice—always made from the pick of the grape crop; always full strength; always pure.**
