Enjoy 24 Hour Hot Water Service with an Automatic GAS WATER HEATER!

This is the time of the year of "In-betweenweather." Sometimes it's too warm outside to keep the furnace fire going and sometimes it's too cold outside to let it go out entirely. Frequently it goes out anyway. That's when Furmite the Freezer puts in his best licks . . . that's when you have Eskimo baths and shivery shaves . . . and all the other very real discomforts of underheated or cold water caused by a low furnace fire or no furnace fire. That's when you need an Automatic Gas Water Heater more than ever! Why not put in a hot water service in your home that is both instant and constant? And that automatically controls both water temperature and fuel cost? That's the Gas way . . . the modern way. Come in and let's talk over the cheapness of cost . . . and the scores of advantages.
