IT TAKES ALL THREE TO MAKE A TELEPHONE CALL

- 1 YOU
- 2 THE TELEPHONE COMPANY
- 3 THE PERSON YOU CALL

A telephone call is a pretty fine example of teamwork. Its successful completion is a matter of co-operation. When you realize that you can reach any telephone in the United States in an average of 1.4 minutes, and that your telephone company handles six million calls every day—that co-operation assumes even greater significance. Six points of co-operation have been set forth in "The Golden Rule of Telephoning." Following them will better your own service and be a real courtesy to others.

"THE GOLDEN RULE OF TELEPHONING"

- ANSWER PROMPTLY—otherwise the person calling may think you are not there and hang up, sometimes causing you to miss a very important call.
- BE SLOW TO HANG UP when calling. Stay at the telephone until you get an answer, a "busy signal," or until you are reasonably sure no one will answer.
- WHAT'S YOUR HURRY, FOLKS? (Illustration of a turtle)
- WHAT SAY, PAL? NOT SO LOUD! (Illustration of a parrot)
- SPEAK INTO THE MOUTHPIECE with your lips about one-half inch from it. This position gives the best voice transmission and the clearest reception.
- HANG UP GENTLY after making certain the other person has finished. Hanging down the receiver may cause a harsh sound in the other person's ear.
- BE SURE OF THE NUMBER before you call. If you're not quite sure, look in the directory. You may save time and avoid a "wrong" number.
- SPEAK DISTINCTLY and about as loud as in ordinary conversation. Your normal tone of voice conveys your message most clearly. No need to shout.
