### Buy New Seats for Deerfield School

The eighth grade of the Deerfield Grammar school has purchased forty new desks. These desks are of a metal type. It is considered the best possible type of seating unit for the modern school. It is expected that these will be delivered to the eighth grade within the month. The seats are of a type that have desk and bar attached, but are so that they are not attached to the floor.

Especially interesting in this purchase is the fact that the seats have been purchased with money raised by this year's eighth grade and previous eighth grade classes. The money has been saved and put into a seating fund for the purchase of this equipment. Committees from the eighth grade class investigated the various styles and met with the Board of Education to decide which model was desirable.

Appreciation was given by the Board of Education to the present and past eighth grade classes who have participated in the program that makes this new equipment possible for the school.

Merit badge requirements on 58 different subjects are also included, and provision made for increasing the number as the need arises.
