I WILL NOT BE RESPONSIBLE FOR any debts contracted by any one but myself. Alana Bradford. X34-36pd

The hope has been expressed that this event will become an annual affair and if it does it should not be long before that feeling of "holding back" will entirely disappear from these sessions. In the meantime, in the words of Walter Winchell, an orchid to both the league and the council for their efforts in starting a truly worthwhile civic custom.

Commissioner Swanson moved that the discussion of the city's contract with the Public Service company, now pending, be postponed until the next meeting scheduled for Monday, November 18. There will be no council meeting on Nov. 11, Armistice Day.

**Vocational Training Classes for Boys At H. P. High School**

Highland Park High school is the only high school along the North-shore which offers two vocational trades and auto mechanics. These courses for boys, namely building courses are planned for those students who must seek employment immediately after graduation and for those who possess mechanical aptitude rather than academic aptitude for an interest in the college preparatory courses. In the fall of 1925, after a careful study had been made by Principal R. L. Sandwick, the board of education deemed it wise to open a vocational building trades course. This work proved so popular and the enrollment grew so rapidly that it seemed advisable to offer another trade class. Therefore in September, (1930), the vocational auto mechanics course was established.

These courses have been an economical addition to the curriculum, as the school board is able to take advantage of the Smith-Hughes Act passed in 1917, by which half of the salaries of the vocational teachers is paid by the federal government through the state department of education in those high schools which offer approved practical work.

Boys must be 16 years of age to enter these courses, and although they are encouraged to spend their school work before choosing either freshman year in the regular high trade course, some are admitted directly from the elementary school on the recommendation of either the principal or the research director of the high school.

It has been found advisable to give the students in building trades one year in the shop and two years (out of a cycle of three) in real construction experience in the erection of a house or building. This year in the shop is spent in rotating the pupil through the six fundamental trades of carpentry, masonry, plumbing, sheet metal work, painting, and electric house wiring, six weeks being devoted to each in order to determine which phase of building trades is of greatest interest to the student and for which of the six trades he shows the greatest aptitude.

During the past 15 years, the building trades classes have built seven houses, an auto mechanics building, a field house for the school, and they are now completing their own shop building, Sandwick Hall, which will also house their related work. Previous to the erection of Sandwick Hall, the building trades classes had no permanent and adequate shop and were forced to use as their headquarters the building under construction.

Some of these buildings have been constructed almost entirely by the students with their instructor, but on others various tradesmen were called in to assist because of the nature of the project, the weather conditions, the size of the classes, or the building codes, but with the understanding that the students be allowed to work with the journeymen wherever possible. Most of the instructional work is of an individual nature, given by the instructor when the need arises.

After graduation many of the building trades students acquire apprenticeships in the trade, while others obtain employment in the form of maintenance work on large estates.

City Clerk Musser read a letter from the secretary of the League of Women Voters thanking the council for its cooperation in making that organization's Town Hall meeting, held the previous Monday evening, such an outstanding success. Every one present at that meeting from the council down to the doorman admitted that the league really "had something there." The only criticism heard at all was the seeming indifference on the part of the audience in the open forum held after the members of the council stated their respective cases and invited questions concerning their activities from the floor. I believe the league could have well stretched a point of ethics and placed a few so-called "plants" in the audience just to help keep the ball rolling. The average citizen at a civic meeting of any kind is usually a pretty bashful individual and he generally needs a little leading on until he gets warmed up to the occasion.

On Monday evening, a fortnight ago, both council and audience were slightly reticent in conducting a real bang-up Town Hall gathering.

sists of a well equipped machine shop, general machine shop, forges, and heat treating and annealing furnaces. Both oxy-acetylene and electric welding are a part of the instructional development. The automobile shop consists of the necessary small, special and precision tools, electric test bench, valve lifter, hydraulic jack, wash rack, battery charger, air compressor, radiator repairing, body fender bump tools and sander, spray painting, and other necessary equipment for general garage work.

Here, too, the work is largely individual, with the exception of lectures and demonstrations given to a few or to the entire group. The student entering the work is given basic tool and machine operations, and later work on cars, which are brought into the shop and repaired, the owner paying only for the necessary parts and materials. The quality of the work has been such that the classes have never been in need of work, and a waiting list enables the instructor to select those tasks which are most in keeping with the course. As the student progresses, there is an opportunity to specialize in one or more phases of the work, such as brakes, ignition, service station management, or the basic operations of gas engines relating to aeronautics or Diesel engines. Safety both in the shop and on the highway is emphasized throughout the course.

Many people are under the impression that the vocational students spend their entire time in doing practical work on the job, but half of their school day, three hours, is spent in the class rooms studying such related subjects as mechanical drawing, science, trade mathematics, social science, and business English. Since the above work is chiefly of an individual nature, students can progress as rapidly as possible, and students entering late or leaving before the end of the year may receive partial credit for the work completed during their attendance. Frequently ordinary class room barriers are broken down to open the way for closer coordination of the shop and the related work.

**Do You Remember**

There are radio quiz programs and many other forms of quiz games and features, but the following school quiz will be of interest to those former students of Deerfield Shields High school as a "remember way back when" in connection with the Golden Jubilee to be celebrated at Highland Park High school, beginning Nov. 7.

—when Mr. Schneider was the only teacher in the Industrial Arts department?

—when Mr. Blanchard, a retired hand master from Fort Sheridan, directed our first band?

—when they used to have 2½¢ checks in the lunchroom because soup, meat, sandwiches, and etc., were only 2½¢?

—when we used to have our auto shop in Skidmore's garage?

—when the drama teacher was Miss Teich, now teacher of drama at Yale?

—when the first play in 1926 was "The Goose Hangs High?"

—when all plays and commencement were held at the Ravinia Park open air theater?

—when the home economics teacher had charge of the lunch room?

**Lady Octavia Marley To Be Heard Sunday At Glencoe Church**

"The European Scene" will be the subject of Lady Octavia Marley's address when she occupies the pulpit of the North Shore Congregational Church at the Sunday morning services on November 10, at eleven o'clock.

Lady Marley, wife of the distinguished member of the House of Lords of the British Parliament, is visiting Chicago on behalf of the

World ORT Federation, a Jewish organization dedicated to the reconstruction and rehabilitation of those dispossessed of home, country and means of livelihood. A brilliant speaker and keen student of political and social problems, Lady Marley's visit to the North Shore is anticipated with great interest. Visitors are always cordially welcome at the services of the North Shore Congregation Israel which is located at the corner of Lincoln and Vernon avenues in Glencoe.

**Tribute Is Paid R. L. Sandwick for Long Service Here**

Continued from Page 1

grown from one to seven, and a large athletic field on the west side of town has been added to the original property. The 97 pupils that first went to school to him have grown to 1,300 not counting the Lake Forest enrollment. The number of teachers has increased from seven to 58.

The attractive high school at Lake Forest which is under the same board as the Highland Park school was also built under Mr. Sandwick. The architect, Stanley Anderson, was a former pupil of his. Educators from all over the country visit this school because it is a rare combination of the beautiful and the functional. Mr. Sandwick seems to have built his very philosophy into its stone and mortar.

Anyone connected with these two high schools, be he parent, teacher, or student, of today or yesterday, will want to see Mr. Sandwick tonight (Thursday) at the Highland Park High school's golden anniversary—will have the privilege of shaking his hand and expressing appreciation for the years of inspired work he dedicated to this, our community.

by Rowena Bennett

**FOR THRIFTY PEOPLE**

Low weekend laundry rates

10% Discount on finished service if sent on Thursday Friday Saturday

Habits are strange things, and the habit of thinking of Monday as washday brings us too much work the first of the week, and not enough at the end. So to break up that Monday habit, we offer even more thrifty rates for washing sent the last three days of the week. You get a bargain, and we equalize our work.

This applies on our Family Finished Service.
