**IN MODERN HOMES
THESE COLD WINTRY
DAYS**

HUMIDAIRE — the One Way to Give You June Atmosphere regardless of outside weather!

On the ideal June day the sun is shining, the slight movement of air is cooling, and it contains enough moisture to prevent drying out of everything it touches. *Nature is in balance!* But what happens in the home in winter when you start your heating plant?

LACK OF HUMIDITY MUST BE SUPPLIED

The hot, dry air absorbs moisture. Absorbs it from the skin, from furniture, from rugs and draperies, from everything it touches. And the result? The family has colds. Resistance to other ills is lowered. Furniture cracks and comes apart. More heat is needed for warmth. Health, comfort, economy suffers!

Worth Three Times Its Cost

I am aware of the importance of proper humidification in relation to health. I installed your HUMIDAIRE Humidifier . . . and if it could not be replaced I would not take in exchange three times what I paid for it.

(Well-known Mid-West Physician)

Offers Relief from

Bronchitis, Laryngitis, etc. Another benefit is the relief from acute respiratory infections.

(Noted Medical Columnist)

Dry Homes Fill Hospitals

We are filling our hospitals by keeping our homes too dry.

(Eastern University Authority)

FREE! Proof of What HUMIDAIRE Will Do for Your Home.

No need for all this to happen in YOUR home! Let one of our specialists check up your home, suggest the proper Model HUMIDAIRE, and point out the ways it would benefit you. No obligations! You're the sole judge of what you want to do about it. Drop in, or phone us.
