FORD ECONOMY WINS AGAIN!

FIRST PLACE IN ITS CLASS GILMORE-GRAND CANYON ECONOMY RUN

23⁰⁵ MILES PER GALLON

AT AN AVERAGE SPEED OF 43.19 MILES PER HOUR!

Earl Gilmore, President of the Gilmore Oil Company, awards trophy to William Knopp, driver of the winning Ford car. Al Stuebing, Hollywood Ford dealer entering the car, looks on.

For the fourteen-hour run the stock model 1941 Ford averaged better than 43 miles an hour over the grueling 599.3-mile course from Los Angeles to the Grand Canyon—through city traffic, across the Mojave Desert and Boulder Dam, up and down the winding roads of three high mountain ranges buffeted by stubborn headwinds, and over ice and slush for the last hundred miles with four inches of snow on the road at the finish! The run from start to finish was under the supervision of the Contest Board of the American Automobile Association. This Ford victory should conclusively prove to every motorist the surpassing economy of the Ford V-8.

Repeating its past triumphs Ford scores a decisive fuel-saving victory. It took an easy first in its class, with the amazing record of 23.05 miles per gallon! The second car in the class averaged 21.71. The stock Ford without overdrive surpassed the record of several higher priced cars equipped with overdrive.

That's official proof of the big, beautiful 1941 Ford's downright pinch-penny economy. Ask any Ford dealer to give you the keys to a 1941 Ford—drive it yourself—and you'll want to own "the low-priced car with the room, the ride, the view, and economy, too!"
