

## Heavenly Dream---

# A HOME ON THE NORTH SHORE

**T**HE young couple dream of a home on the North Shore, the heavenly goal of life on this earth . . . and thank God that our American way of life has permitted this dream to come true many thousands of times.

The home on the North Shore has an added practical meaning when you include in its plans Nature's most ideal fuel, Gas, for gas service is the cheap aid to better modern living.

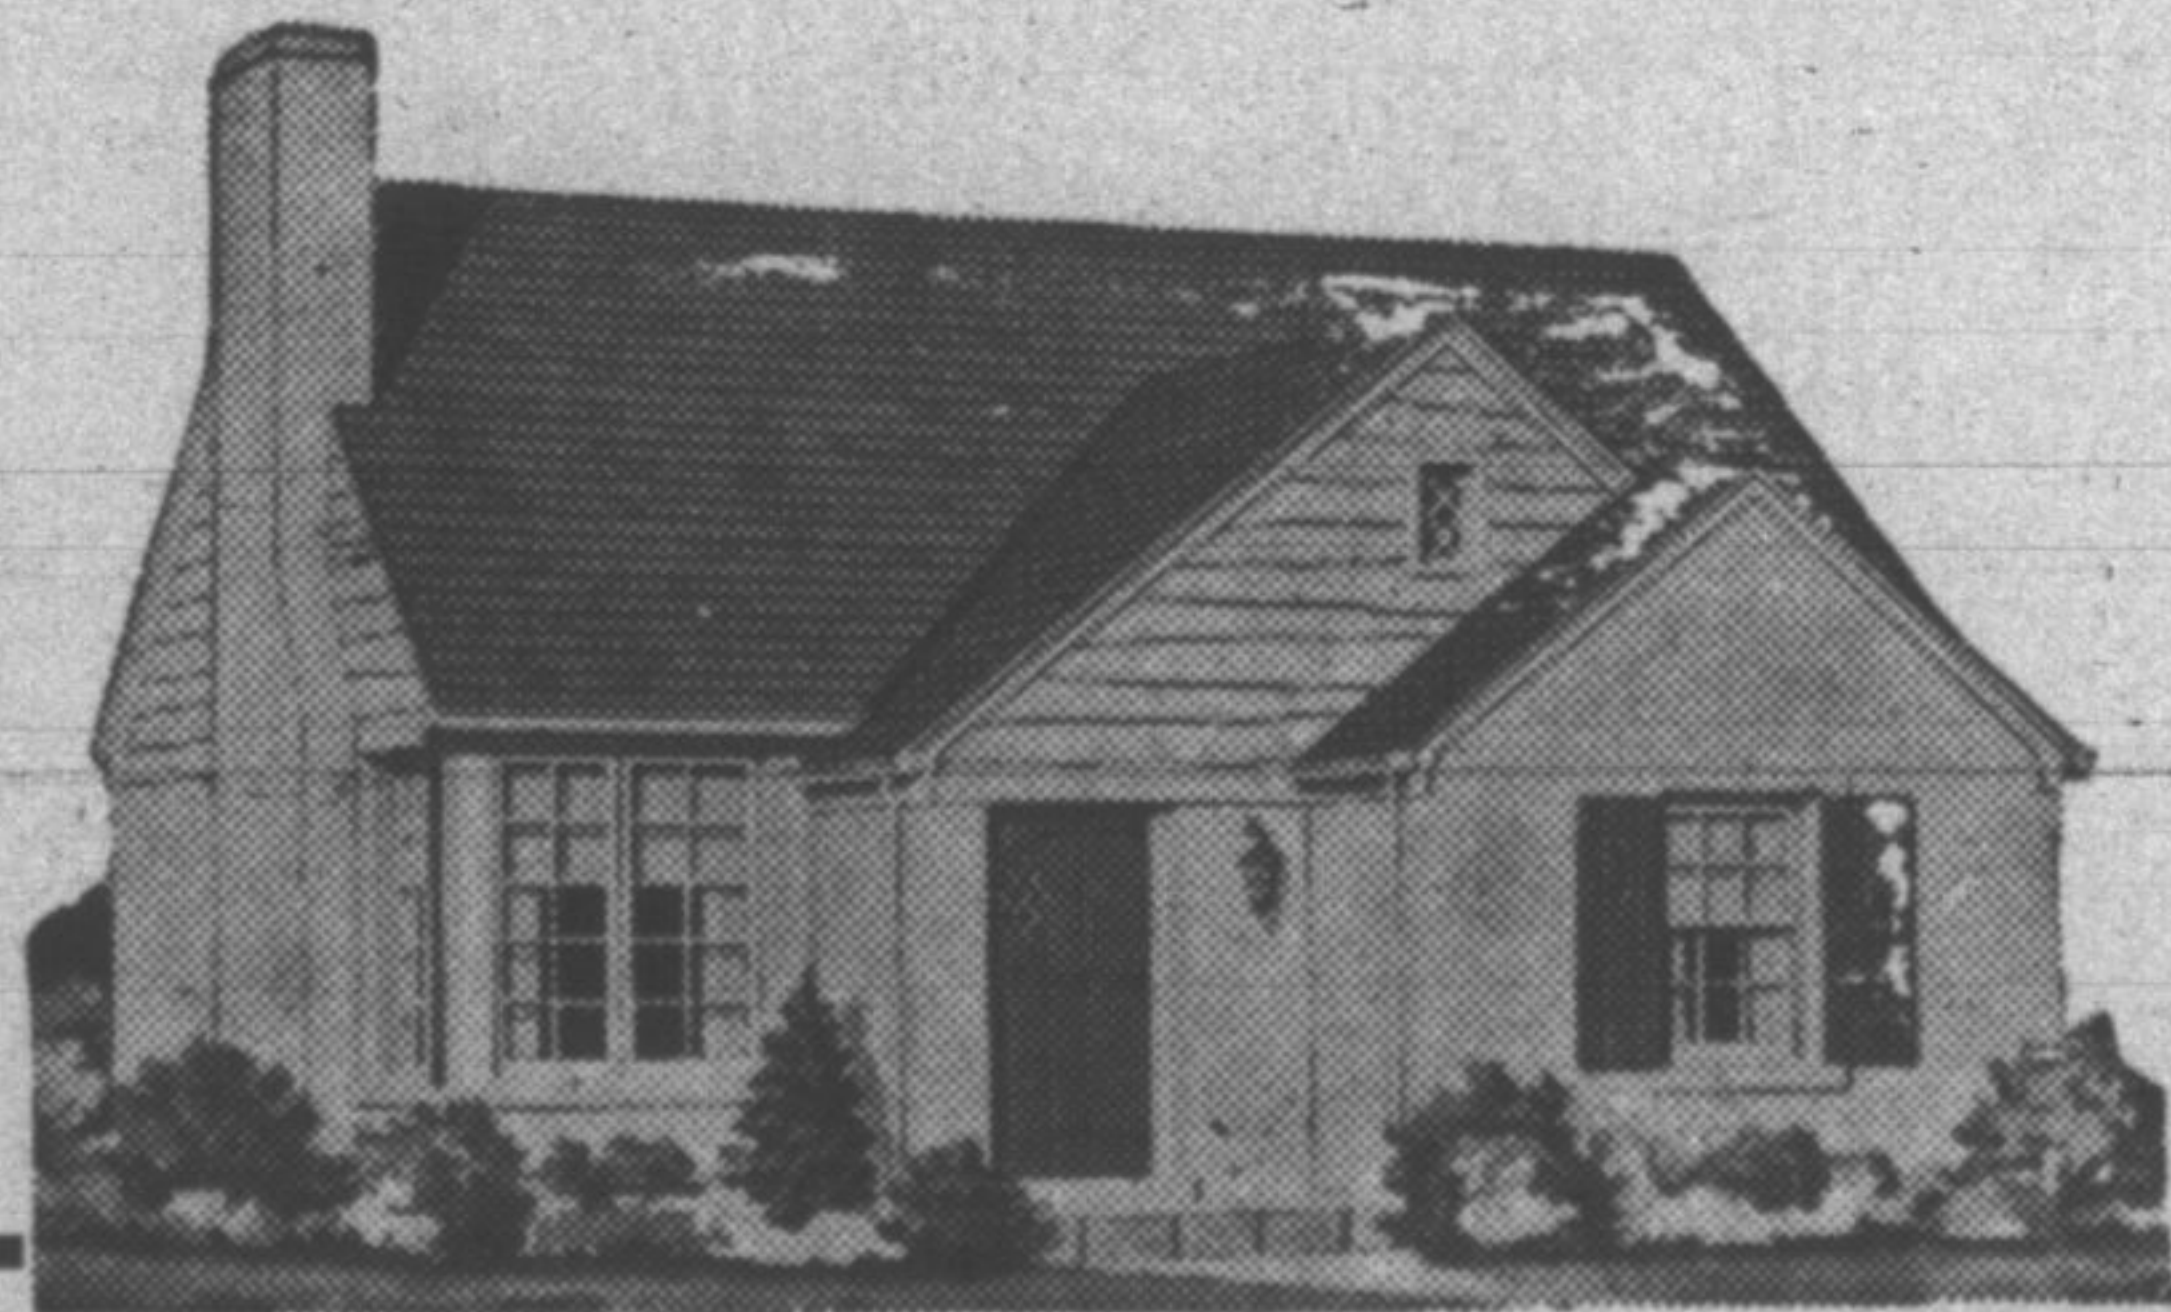

Gas service brings you the convenience, comfort and leisure in living as you have dreamed it—the thrill of the enjoyment of modern living.

This year brings new refinements and many improvements in creative gas cookery. Particular attention has been paid to make gas ranges more efficient, using less gas than ever before, with better and more healthful results. Vitamin vigorous foods are cooked in the modern gas range even though the cook might be far away at her gar-

den club meeting. When she comes home the meal is finished.

Of course, nearly all unbiased builders and architects agree that gas is the ideal fuel for house heating with its even temperatures, cleanliness and healthier living. Proper air conditioning in the home, both winter and summer, is part of the function of gas service. Proper humidification means longer life for the furniture and your home, as well as better health for the family.

Refrigeration and water heating are important, too, and gas solves these problems to the best satisfaction.

Phone your local office of the North Shore Gas Company today and inquire more into the facts of gas for the five major services of your home. You will be amazed at the estimate of how little this will cost and how much more convenience and pleasure you will get out of life in the All-Gas Home.
